Siap Om Hen..!!

Insya Allah semuanya akan berjalan lancar di Grobogan.. Sy tidak kuatir masalah equipment, antena dan skill operator tim YE2R karna sdh 2 tahun berturut turut contest station YE2R telah terbukti The Finest in YB Land.. Yang saya kuatir cuma satu: PLN jangan sampai terganggu alias mati lampu yg pernah terjadi di Tahun Lalu berkali kali pas saat kontes baru mulai n kita semua sedang enjoooy working the pile up.. Hehehe.. Kalao mslh propagasi ya leave it to yang berkuasa saja lah kepada yang di Atas kita semua.. Hehehe..

Thanks and mohon doanya yaa Om Hen dan rekan2 YBDXC..

Salam,
Joy/YB0NSI..

Berat juga nih tuk menyanggupi perintah dari para petinggi YE2R tuk memecahkan rekor 2012. Belum lawan2 kita yg semangat nya luar biasa !! Lagi pula ada satu tim yg sedang beroperasi dari suatu pulau terpencil dimana dah pasti noise levelnya sangat

rendah dan mereka sedang dicari cari para DXers..Wah untung saja ada pecel kangkung sama swikee DAN host kami Om Hans YB2DX dan Om Seno YB2LSR yg sangat baik dan murah hati. Sy yakin semangat dan motivasi para operator YE2R tetap tinggi n siap tempur!! Mohon doanya yaaa Om Hen dan rekan2 YBDXC..

Insya Allah semuanya akan berjalan lancar di Grobogan.. Sy tidak kuatir masalah equipment, antena dan skill operator tim YE2R karna sdh 2 tahun berturut turut contest station YE2R telah terbukti The Finest in YB Land.. Yang saya kuatir cuma satu: PLN jangan sampai terganggu alias mati lampu yg pernah terjadi di Tahun Lalu berkali kali pas saat kontes baru mulai n kita semua sedang enjoooy working the pile up.. Hehehe.. Kalao mslh propagasi ya leave it to yang berkuasa saja lah kepada yang di Atas kita semua.. Hehehe..

Thanks and mohon doanya yaa Om Hen dan rekan2 YBDXC..

Berat juga nih tuk menyanggupi perintah dari para petinggi YE2R tuk memecahkan rekor 2012. Belum lawan2 kita yg semangat nya luar biasa !! Lagi pula ada satu tim yg sedang beroperasi dari suatu pulau terpencil dimana dah pasti noise levelnya sangat rendah dan mereka sedang dicari cari para DXers..Wah untung saja ada pecel kangkung sama swikee DAN host kami Om Hans YB2DX dan Om Seno YB2LSR yg sangat baik dan murah hati. Siap Om Hen..!!

Insya Allah semuanya akan berjalan lancar di Grobogan.. Sy tidak kuatir masalah equipment, antena dan skill operator tim YE2R karna sdh 2 tahun berturut turut contest station YE2R telah terbukti The Finest in YB Land.. Yang saya kuatir cuma satu: PLN jangan sampai terganggu alias mati lampu yg pernah terjadi di Tahun Lalu berkali kali pas saat kontes baru mulai n kita semua sedang enjoooy working the pile up.. Hehehe.. Kalao mslh propagasi ya leave it to yang berkuasa saja lah kepada yang di Atas kita semua.. Hehehe..

Thanks and mohon doanya yaa Om Hen dan rekan2 YBDXC..

OK OM Joy dkk,
Bila perlu selama kontes berlangsung saya pake kaosnya YE2R - mungkin ada pengaruhnya ya. HI.
Kalo takut masalah PaLiNo (PLN) itu OM Seno sudah siapkan genset dan switch otomatisnya yg waktu itu pernah dipost di FB.

Good Luck my friends

OM Tommy,
Saya nukar Rp dg IRC Japon juga 4500, maksudnya beli IRC Japon dan ada 2 australia @ Rp 4.500,-/lbr.
Kalo IRC Japon dihargai Rp 4.500,- berarti tarip pos lama dong ya khan memang ke JA utk berat sampai 20gram = Rp 4.500,-
Tapi EU dapat Rp 8000 dan USA Rp 9000.-
?
Kalo gak salah penggunaan IRC khan utk pengganti perangko, jadi ketika kita akan mengirimkan surat ke Jepang utk pengganti perangkonya kita serahkan IRC Japon, kalo kirim ke USA/NA kita serahkan IRC USA dsb.
Tapi sepertinya gak begitu ya ? Bisa seperti pengganti cek.
?
Saya klaim DUF Award?ke REF-Perancis, persyaratannya dilampiri IRC beberapa lembar.
Kebetulan yang tersedia dan termurah di Pasar Baru IRC Japon ya itulah yg saya lampirkan dan gak bermasalah.?
?

Sy tidak kuatir masalah equipment, antena dan skill operator tim YE2R karna sdh 2 tahun berturut turut contest station YE2R telah terbukti The Finest in YB Land.. Yang saya kuatir cuma satu: PLN jangan sampai terganggu alias mati lampu yg pernah terjadi di Tahun Lalu berkali kali pas saat kontes baru mulai n kita semua sedang enjoooy working the pile up.. Hehehe.. Kalao mslh propagasi ya leave it to yang berkuasa saja lah kepada yang di Atas kita semua.. Hehehe..

Berat juga nih tuk menyanggupi perintah dari para petinggi YE2R tuk memecahkan rekor 2012. Belum lawan2 kita yg semangat nya luar biasa !! Lagi pula ada satu tim yg sedang beroperasi dari suatu pulau terpencil dimana dah pasti noise levelnya sangat rendah dan mereka sedang dicari cari para DXers..Wah untung saja ada pecel kangkung sama swikee DAN host kami Om Hans YB2DX dan Om Seno YB2LSR yg sangat baik dan murah hati. Sy yakin semangat dan motivasi para operator YE2R tetap tinggi n siap tempur!! Mohon doanya yaaa Om Hen dan rekan2 YBDXC..

Sy tidak kuatir masalah equipment, antena dan skill operator tim YE2R karna sdh 2 tahun berturut turut contest station YE2R telah terbukti The Finest in YB Land.. Yang saya kuatir cuma satu: PLN jangan sampai terganggu alias mati lampu yg pernah terjadi di Tahun Lalu berkali kali pas saat kontes baru mulai n kita semua sedang enjoooy working the pile up.. Hehehe.. Kalao mslh propagasi ya leave it to yang berkuasa saja lah kepada yang di Atas kita semua.. Hehehe..

Lagi pula ada satu tim yg sedang beroperasi dari suatu pulau terpencil dimana dah pasti noise levelnya sangat rendah dan mereka sedang dicari cari para DXers..Wah untung saja ada pecel kangkung sama swikee DAN host kami Om Hans YB2DX dan Om Seno YB2LSR yg sangat baik dan murah hati. Ha....!
Di NJ, OM Steve dapat panggilan kantor pos karna adanya kiriman surat utk W2FB.
Di kantor pos setempat, OM Steve harus bayar kekurangan biaya perangko plus denda, xixixi.

Tapi itu cara dulu di Indonesia dan utk surat dalam negeri, kalo utk DX pos yg keluar biaya kantor pos indonesia, yg terima dendanya kantor pos NJ dong ya.

salam
hen

Ya jaman dulu pernah bbrp kali dapat "postage due" dr dalam dan luar negeri tp krn kenal ibu posnya (di sini bu pos bukan pak pos lho, emansipasi sdh lebih maju hi hi) dia masukin aja ke kotak saya besoknya saya tinggalin uangnya di kotak pos.

Yg payah kalau terima registered mail musti ke kantor pos dan ngantre. Nah belakangan sejak kenal bu pos, dia selalu antarkan krn saya sudah tanda tangan blangko tanda terima tercatat segepok, jd gak usah ke kantor pos ambil surat tercatat.

4000perak sdh pernah terima dari YB4IR kalau gak salah waktu dikirim YB6N qsl. Jadi walau lama pasti sampe.

Ha....!
Di NJ, OM Steve dapat panggilan kantor pos karna adanya kiriman surat utk W2FB.
Di kantor pos setempat, OM Steve harus bayar kekurangan biaya perangko plus denda, xixixi.

Tapi itu cara dulu di Indonesia dan utk surat dalam negeri, kalo utk DX pos yg keluar biaya kantor pos indonesia, yg terima dendanya kantor pos NJ dong ya.

FT5Z, AMSTERDAM ISLAND (Press Release, Date October 21st): "A sea container filled with our equipment --- transceivers, amplifiers, antennas, wire and cable, connectors, baluns, bandpass filters, camp supplies, and other miscellaneous equipment -- is now on its way to New Zealand. There it will be loaded aboard our ship, the MV Braveheart. The Braveheart crew and our VK6 friends have our shopping lists for other needed materials and are procuring these items for us. These materials will all come together in January when the Braveheart and the FT5ZM team arrive in Fremantle, Australia.
Our network and logging team are in the last round of testing our system for the seamless uploading of our logs. Currently we can export 400 QSO's each hour from each of 10 PC's in approximately 500 msec. The log collection will be automatic, so there is no interruption of operator time. A zipped log file with 100,000 QSO's will be just over 600 Kb in size, saving time and money on satellite uploads. The process has been tested end to end, including uploading to ClubLog.
We are in the phase of the DXpedition where large expenses are coming at us rapidly. We've completed one down payment on our ship, we've had to purchase some equipment and shipping supplies, shipping and customs fees have been paid, our anchorage and per diem costs at Amsterdam Island are coming due, we will be seeing berthing and ship supply charges from Fremantle soon, and we have another ship payment due on December 1.
We are staying within our budgeted expenses, but contributions have been somewhat less than we had hoped. It now appears almost certain that the team members will have to increase their personal contribution from $10,000 per person to $12,500 per person as well as pay their own way to and from Fremantle, Australia. If you've contributed to the DXpedition, we thank you. If you've yet to help us, or if you can send some additional help our way, we can certainly use any financial support that you can give us.
Please continue to check our progress, our news updates, and photos on our website: <www.amsterdamdx.org> If, while you are there, you'd hit the 'Donate' tab, we'd really, really appreciate it.
Ralph ☐ K0IR"

(Sorry, he said his server is down)
Apart from having worked him or not, the document is very interesting for the comments on RX and TX antennas and useful to get some ideas for a successful low-band operation. We knew already the 160m dedication and effort of Tomas, but now we learn how much experience, preparation and technical skill is behind his DXpeditions. Enjoy reading it."

ZS8, MARION ISLAND. Carson, ZS8C (ZR6CWI), posted the following on QRZ.com on October 22nd: "I have managed to move my radio into my office, making

HAM activities much simpler (I used to have it installed in our emergency base which can get a bit cold!). Recently I have started becoming more active on the air, and I am hoping to make a lot more contacts in the coming weeks and months. My preferred method of making contacts is to arrange a 'private' sked between a couple of HAMs. Please note that my signal is a bit weak due to my set-up, so you might have to listen very closely. Due to island rules, I cannot upgrade my antenna, so I am stuck with what I've got. If you would like to arrange a sked, please pop me an E-mail <zs8c@...>. I look forward to meeting as many HAMs as I can. Thank you to everyone who has made contact with me. It is always exciting meeting different people from around the world, which is one of the things I enjoy the most!" QSL via info on QRZ.com. PLEASE NOTE: Carson has a new mailing address: Carson McAfee, PO Box 1585, Allens Nek, 1737, Roodepoort, Johannesburg, S. Africa.

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha
Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai
berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,
setiap anggota team kami ini mempunyai latar belakang dan profesi yg
berbeda beda, namun mereka bisa saling mengisi, saling mendukung,
persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band
selama kompetisi berlangsung menunjukan sikap condx yang kurang
bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit
dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band
menjadikan kompensasi bagi team kami untuk menambah score karena hampir
secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,
sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,
masih mendingan di 40m disini team kami agak lebih mudah dalam
membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal,
alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis
Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu
mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2LSR, supporter and accommodation

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation
YB0AR, 40m specialist

YB2WB, High band specialist, supporter and accommodation
YB2DX, Low band specialist, supporter and accommodation
YB4IR, DX-advisor, IT

" Kalah atau menang dalam suatu kompetisi adalah suatu yang biasa, namun kekompakan dalam team adalah luar biasa"

salam sejahteraSeno, YB2LSR

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha
Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai
berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,
setiap anggota team kami ini mempunyai latar belakang dan profesi yg
berbeda beda, namun mereka bisa saling mengisi, saling mendukung,
persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band
selama kompetisi berlangsung menunjukan sikap condx yang kurang
bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit
dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band
menjadikan kompensasi bagi team kami untuk menambah score karena hampir
secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,

sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,
masih mendingan di 40m disini team kami agak lebih mudah dalam
membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal,
alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis
Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu
mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation

Subject: [YBDXC_News] YE2R @ CQWW 2013

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha
Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai
berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,
setiap anggota team kami ini mempunyai latar belakang dan profesi yg
berbeda beda, namun mereka bisa saling mengisi, saling mendukung,
persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band
selama kompetisi berlangsung menunjukan sikap condx yang kurang
bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit
dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band
menjadikan kompensasi bagi team kami untuk menambah score karena hampir
secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,
sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,
masih mendingan di 40m disini team kami agak lebih mudah dalam
membukukan

qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal, alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2LSR, supporter and accommodation

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation
YB0AR, 40m specialist

YB2WB, High band specialist, supporter and accommodation
YB2DX, Low band specialist, supporter and accommodation
YB4IR, DX-advisor, IT

" Kalah atau menang dalam suatu kompetisi adalah suatu yang biasa, namun kekompakan dalam team adalah luar biasa"

salam sejahteraSeno, YB2LSR

OM Busan, dkk..

Mewakili OM Henky Maryono (bukan Marsono) - YB0JK, saya mengucapkan Terima kasih dan Apresiasi atas diterimanya beliau di YBDXC. Beliau adalah kakak dari ibu saya dan sudah berusia 66 tahun saat ini. Juga merupakan mentor dan elmer saya pertama kali yang memperkenalkan saya dengan Amateur Radio.

Beliau pernah lama tidak aktif on air dan IAR-nya mati, namun sekarang sudah diaktifkan kembali dan masih memiliki hak terhadap callsign-nya setelah sekian lama....

Mohon untuk dibantu dan dibimbing untuk memperkenalkan beliau kepada penggunaan teknologi komputerisasi pada DX-ing, selain Logger32 ...sementara ini saya sudah memperkenalkan dg LOTW dan HRDLog. Kartu QSL yang tersisa hanya 200-an pcs karena terkena musibah banjir besar, juga sertifikat kontes dsb yang terkait dg DX-ing..sekarang sedang dicoba dimasukkan ke database lg.

Semoga kedepan bisa bergabung lagi on the air dan DX-ing setelah sekian lama hanya monitor di band 40M. Terima kasih.

DX Special Bulletin No. 1134.1
BID: $OPDX.1134.1
October 29, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network CX3AN and W8GEX for the following DX information.

KH9, WAKE ISLAND (Update/Scheduled - Press Release #6): "The Wake Atoll Commemorative DXpedition team has been approved for entry onto Wake Atoll. Our equipment is already on Wake and in safe storage awaiting our arrival. The 12-Operator team includes: Joe -AA4NN, John-K6MM, Craig-K9CT, Mike-K9NW, Ralph-K9ZO, Lou-N2TU, Jim-N9TK, Mark-NA6M, Dick-W3OA, Joe-W8GEX, Hal-W8HC, and Jerry-WB9Z.
The plan is for the team to assemble in Hawaii on 30-October, depart 01-November, arrive on 02-November and immediately erect antennas and set-up the stations. There will be two CW and two SSB stations on the air. The CW site will be located across from the Arrivals terminal and the SSB site will be housed in a "beach house" near downtown Wake.
We are planning on being QRV 03-November through 15-November (Wake time).
If there are any changes, they will be posted on our website.
http://wake2013.org/pages/bandplan.html
Logs will be uploaded to ClubLog as time and internet access allows.
This is a commemorative DXpedition. Our prime objective is to honor the lives and contributions of the Forgotten 98 civilian contractors who lost their lives on Wake during WWII. Some of these men have yet to be identified. If you know any of the Forgotten 98 or their relatives, modern DNA testing may identify their remains and provide for a proper burial. Please take a moment to look through their names.
http://wake2013.org/pages/forgotten98.html
Wake Atoll is an active military base and access is extremely limited. The Team is most grateful to the United States Air Force for allowing this Commemoration to take place.
Also, Team wants to thank the DX community, including generous worldwide Foundations, Clubs, Individuals, Equipment manufacturers and outlets for their outstanding support of the Wake commemorative efforts. These DX-peditions are extremely expensive and could not be accomplished without the support of the entire DX community Visit the website to view our sponsors and make your personal donation. http://wake2013.org/pages/sponsors.html
Please note! A few other DXpeditions will be on the air during the Wake

operation. To avoid the dreaded "not in the log", please be sure which
DXpedition you are working! Our operators will announce the K9W callsign
often to help identify your contact.
Please check our website frequently for updates. http:/wake2013.org/
And don't forget to sign our guestbook!

http://www.eqsl.cc/qslcard/FAQ-Old.cfm#SWL

* How do I handle SWL cards? When a user sets the SWL/HAM checkbox in his Profile to SWL, it automatically forces all incoming and outgoing cards to say 'Confirming SWL Reception' instead of the usual 'This Confirms Our 2-Way QSO'. If you are an SWL, just make sure to go to My Profile and set yourself up as an SWL. If you are a ham, when you send an eQSL to an SWL, it will automatically put the correct wording into the card.

http://www.eqsl.cc/qslcard/Article001.cfm

And now eQSL.cc is also a favorite site for SWLs, because users can identify themselves as either licensed amateur operator, or SWL. The eQSL cards between SWLs and hams are automatically configured to contain proper SWL phrasing, making their lives easier and saving them tons of money.
Complex systems shouldn't be designed in a vacuum, so we have assembled a capable group of hams and SWLs into an Advisory Board. Among these advisors are users with satellite and DX experience, contesting backgrounds, and international origins, as well as technology gurus and people with long-term operating histories. This group discusses current issues and future development plans for the site on a daily basis. Just another feature of the interconnected world we have entered as the 21st Century dawns.There were nay-sayers when SSB first began to push CW aside. There were those who thought packet radio was just a short-lived fad. Others thought we shouldn't be wasting money on amateur satellites. And some people think eQSLs are "not natural". But for tens of thousands of hams and SWLs who upload their entire logbooks nightly in an effort to live up to the "100% QSL" promise of amateur radio, the final courtesy of a QSO is an eQSL.

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai berakhirnya kompetisi.
disini kami melihat bahwa team kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan dengan secara otomatis, seperti tidak ada komando namun semuanya berjalan dengan tertib dan semangat yang luar biasa yang terpancar dari setiap anggota team bahkan tidak ada yang mengeluh, setiap anggota team kami ini mempunyai latar belakang dan profesi yg berbeda beda, namun mereka bisa saling mengisi, saling mendukung, persahabatan yang tidak bisa dilupakan sepanjang masa.

namun kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band selama kompetisi berlangsung menunjukan sikap condx yang kurang bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit dibandingkan dengan tahun yg lalu.
Band yg masih tetap eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band menjadikan kompensasi bagi team kami untuk menambah score karena hampir secara keseluruhan condx band ini lumayan bagus.

Low Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak, sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan sering, menjadikan kami tidak sabar untuk agak berlama lama disini, masih mendingan di 40m disini team kami agak lebih mudah dalam membukukan qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal, alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band menjadikan kompensasi bagi team kami untuk menambah score karena hampir secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak, sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan sering, menjadikan kami tidak sabar untuk agak berlama lama disini, masih mendingan di 40m disini team kami agak lebih mudah dalam membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal, alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2LSR, supporter and accommodation

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation
YB0AR, 40m specialist

YB2WB, High band specialist, supporter and accommodation
YB2DX, Low band specialist, supporter and accommodation
YB4IR, DX-advisor, IT

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha

Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan dengan secara otomatis, seperti tidak ada komando namun semuanya berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh, setiap anggota team kami ini mempunyai latar belakang dan profesi yg berbeda beda, namun mereka bisa saling mengisi, saling mendukung, persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band selama kompetisi berlangsung menunjukan sikap condx yang kurang bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band menjadikan kompensasi bagi team kami untuk menambah score karena hampir secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak, sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan sering, menjadikan kami tidak sabar untuk agak berlama lama disini, masih mendingan di 40m disini team kami agak lebih mudah dalam membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal, alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2LSR, supporter and accommodation

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation
YB0AR, 40m specialist

YB2WB, High band specialist, supporter and accommodation
YB2DX, Low band specialist, supporter and accommodation
YB4IR, DX-advisor, IT

" Kalah atau menang dalam suatu kompetisi adalah suatu yang biasa, namun kekompakan dalam team adalah luar biasa"

salam sejahteraSeno, YB2LSR

Subject: [YBDXC_News] YE2R @ CQWW 2013

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di
Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha
Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai
berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,

setiap anggota team kami ini mempunyai latar belakang dan profesi yg berbeda beda, namun mereka bisa saling mengisi, saling mendukung, persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band selama kompetisi berlangsung menunjukan sikap condx yang kurang bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band menjadikan kompensasi bagi team kami untuk menambah score karena hampir secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak, sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan sering, menjadikan kami tidak sabar untuk agak berlama lama disini, masih mendingan di 40m disini team kami agak lebih mudah dalam membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal, alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Operator YE2R :

YC2FAJ, Low band spesialist

YB2WBF, Low band specialist

YB2LSR, supporter and accommodation

YB2TJV, designer

YB0NSI, 10m specialist, supporter and accommodation
YB0AR, 40m specialist

YB2WB, High band specialist, supporter and accommodation
YB2DX, Low band specialist, supporter and accommodation
YB4IR, DX-advisor, IT

" Kalah atau menang dalam suatu kompetisi adalah suatu yang biasa, namun kekompakan dalam team adalah luar biasa"

salam sejahteraSeno, YB2LSR

Betul OM Bambang sarannya itu.
Kalo misalnya ikut ujian ke Penegak sebelum ganti suffix nanti jadi susah, mosok jadi balik ke Penggalang ?

- Kalo ujian duluan ke Penegak, maka calsignnya = YB to be YC (YB2BYC)
- Harusnya ganti dulu jadi : YC to be YB (YC2BYB), selanjutnya ujian dan YB to be YB = keren...!!

Glodaggg....., kata OM Seno.

Ngomong2 soal callsign - dulu atau mungkin masih ada sampai sekarang perusahaan minuman ringan yg namanya YEOS.
Kalo tahun depan jadi sponsor tim kontes ORDA DKI boleh juga tuh pakai YE0S.

Betul OM Bambang sarannya itu.

Kalo misalnya ikut ujian ke Penegak sebelum ganti suffix
nanti jadi susah, mosok jadi balik ke Penggalang ?

- Kalo ujian duluan ke Penegak, maka calsignnya = YB to be
YC (YB2BYC)

- Harusnya ganti dulu jadi : YC to be YB (YC2BYB),
selanjutnya ujian dan YB to be YB = keren...!!

Wah OM Agus bilang : "Sapa yg haruskan ?"

Tunggu bbrp bln lg, callsign akan

dikonversi dr yc-2-byc [baca: yc-To be-yc] jd yc-To be-yb,

trs bbrp bln lg resmi jd YB2YB (klo' blm dipake orang

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,
sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,
masih mendingan di 40m disini team kami agak lebih mudah dalam
membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal,
alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis
Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu
mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Betul OM Bambang sarannya itu.
Kalo misalnya ikut ujian ke Penegak sebelum ganti suffix nanti jadi susah, mosok jadi balik ke Penggalang ?

- Kalo ujian duluan ke Penegak, maka calsignnya = YB to be YC (YB2BYC)
- Harusnya ganti dulu jadi : YC to be YB (YC2BYB), selanjutnya ujian dan YB to be YB = keren...!!

Wah OM Agus bilang : "Sapa yg haruskan ?"

Haaaaaaaa..... (menangis sedih meratapi nasib)
Saya ngedengar aja gak - apalagi bisa QSO.
Pagi tadi juga QSO dg 8R1AK yang pertama agak meragukan karena signalnya turun-naik tapi bukan QSB.
Tapi setelah beberapa saat kemudian kebetulan saya masih monitor frequencynya, signalnya menguat - jadi saya panggil lagi.

Buat saya awalnya yg penting bisa dengar dulu deh....
So pasti ya..!!??

Sebenarnya setahu saya dari laporannya Mr Cluster
ada 2 AR dari Zone 2 masuk ke 10M atau 15M - tapi gak
terdengar.

Kalo yang di 20M itu tepatnya mereka di frequency berapa,
apa di atas 14.150MHz ???

OM Har,
Yaudah, insya Allah berikutnya deh.
Ntar malahan menang lagi...! ;-)

Tapi saya suka kontes yang menggunakan contest exchange Zone, Umur - bukan yang serial number.
Jadi gak minder kasih report 59 28 atau 59 58 terus2an dibanding terima repot 59 331 tapi kirim report 59 001.
Karna saya cuma pilih : entity baru, state baru, LoTW user atau yg signalnya kuat. HI

Teman AR yg budiman,

sepanjang 2 hari yang lalu kami tim YE2R mengikuti kompetisi CQWW SSB di rumah YB2DX di Grobogan Purwodadi,
Rasa
syukur yg tidak henti hentinya kami panjatkan kepada Tuhan Yang Maha
Esa karena semuanya berjalan dengan baik, dari awal persiapan sampai
berakhirnya kompetisi.
disini kami melihat bahwa team
kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,
setiap anggota team kami ini mempunyai latar belakang dan profesi yg
berbeda beda, namun mereka bisa saling mengisi, saling mendukung,
persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band
selama kompetisi berlangsung menunjukan sikap condx yang kurang
bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit
dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band
menjadikan kompensasi bagi team kami untuk menambah score karena hampir
secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,
sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal,

20m = 1152 QSO

kontes YE2R kali ini bukan hanya semata mata mencari skor, namun juga
kekompakan dan kekeluargaan yang sangat luar biasa, semuanya berjalan
dengan secara otomatis, seperti tidak ada komando namun semuanya
berjalan dengan tertib dan semangat yang luar biasa yang
terpancar dari setiap anggota team bahkan tidak ada yang mengeluh,
setiap anggota team kami ini mempunyai latar belakang dan profesi yg
berbeda beda, namun mereka bisa saling mengisi, saling mendukung,
persahabatan yang tidak bisa dilupakan sepanjang masa.

namun
kekuatan alam memang membuat kami agak sedikit kelelahan, 20 meter band
selama kompetisi berlangsung menunjukan sikap condx yang kurang
bersahabat sehingga kami mendapatkan jumlah qso yg lebih sedikit
dibandingkan dengan tahun yg lalu.
Band yg masih tetap
eksis sepertinya adalah 15 meter band, namun diluar dugaan 10 meter band
menjadikan kompensasi bagi team kami untuk menambah score karena hampir
secara keseluruhan condx band ini lumayan bagus.

Low
Band 80meter kali ini juga agak lumayan walau pun tidak begitu banyak,
sepertinya pemain diband ini juga jarang kedengaran, ditambah lagi
suasana hujan kilatan petir membuat QRN static noise yg sangat besar dan
sering, menjadikan kami tidak sabar untuk agak berlama lama disini,
masih mendingan di 40m disini team kami agak lebih mudah dalam
membukukan
qso.

Seperti halnya di 80meter, kali ini band 160m memang benar2 kami tinggal,
alasan yg agak mirip dengan 80meter, walaupun beberapa spesialis
Lowband kami YB2DX, YB0AR, YC2FAJ sudah berusaha untuk membantu
mendengarkan via antena RX, namun hasilnya masih tetap nihil.

dibawah ini kami secara rinci perolehan qso yg berhasil kami bukukan :
10m = 1236 QSO

15m = 1614 QSO

20m = 1152 QSO

40m = 685 QSO

80m = 81 QSO
Total = 4768 QSO

Claim score : 7,975,460

Glodaggg....., kata OM Seno.

Ngomong2 soal callsign - dulu atau mungkin masih ada sampai sekarang perusahaan minuman ringan yg namanya YEOS.
Kalo tahun depan jadi sponsor tim kontes ORDA DKI boleh juga tuh pakai YE0S.

Betul OM Bambang sarannya itu.

Kalo misalnya ikut ujian ke Penegak sebelum ganti suffix
nanti jadi susah, mosok jadi balik ke Penggalang ?

- Kalo ujian duluan ke Penegak, maka calsignnya = YB to be
YC (YB2BYC)

- Harusnya ganti dulu jadi : YC to be YB (YC2BYB),
selanjutnya ujian dan YB to be YB = keren...!!

Wah OM Agus bilang : "Sapa yg haruskan ?"

Tunggu bbrp bln lg, callsign akan

dikonversi dr yc-2-byc [baca: yc-To be-yc] jd yc-To be-yb,

trs bbrp bln lg resmi jd YB2YB (klo' blm dipake orang

Yon Yctwo Uniformalfa Kepentingan hukum yang hendak dilindungi dalam Permen 33/2009 adalah PRINSIP PERLINDUNGAN KEDAULATAN INDONESIA, sehingga amatir radio (berlisensi) dari manapun yang QRV di manapun wilayah Indonesia maka harus mendapatkan ijin IAR Pemerintah Indonesia, dengan perkecualian bagi guess operator. Dalam pemberian ijin IAR bagi amatir radio asing, pemerintah memberikan kewenangan kepada organisasi ORARI untuk memberikan REKOMENDASI yang dijadikan bahan Pemerintah dalam menerbitkan IAR Indonesia.

PRINSIP PERJANJIAN TIMBAL-BALIK ANTAR NEGARA. Setiap pemegang IAR dari negara manapun sudah terkandung tingkatan kecakapan amatir radio. Dengan adanya perjanjian timbal balik antar negara, maka Pemerintah Indonesia tidak perlu menguji lagi kecakapannya pemohon, tetapi dengan REKOMENDASI ORARI dan syarat penerbitan perijinan yang transparan, Pemerintah memberikan ijin IAR sesuai dengan kualifikasi kecakapan IAR dari negara asalnya.
Ini sama prinsipnya dengan pemegang Sertifikat Operator Radio Kelas II, maka dia tidak perlu mengikuti UNAR lagi sesuai tingkatan kualifikasinya.

Konteksnya dengan ujian amatir radio dari FCC United States yang diselenggarakan di manapun, termasuk Indonesia. Prinsipnya IAR yang diterbitkan FCC US tidak bisa digunakan untuk OTA di wilayah Indonesia. Namun berdasarkan prinsip perjanjian timbal balik antara pemerintah US dan Indonesia, kualifikasi kecakapan yang terkandung dalam IAR dari FCC U.S. diakui Pemerintah Indonesia. Katakanlah saya pemegang lisensi Penggalang dengan callsign YC2UA, jika saya mempunyai lisensi IAR Extra Class yang diterbitkan FCC US, maka berdasarkan prinsip perjanjian timbal balik antara pemerintah Ind dan US saya bisa mengajukan ijin IAR Penegak kepada Pemerintahan Indonesia-- dengan melalui organisasi ORARI -- tanpa perlu ikut UNAR Kenaikan Tingkat Penegak.

Dalam hal WNI yang memiliki IAR asing, meskipun ini belum diatur secara tekstual dalam Permen 33/2009 dan RPMnya, kiranya berdasarkan prinsip persetujuan timbal balik dan prinsip kedaulatan negara, maka IARnya tidak bisa digunakan OTA di Indonesia, namun kualifikasi kecakapan yang terkandung dalam IAR itu – menimbulkan konsekuensi -- diakui Pemerintah Indonesia dan ybs bisa mengajukan permohonan penerbitan IAR Indonesia kepada Pemerintah Indonesia -- dengan melalui organisasi ORARI tentunya -- berdasarkan IAR asingnya sesuai kualifikasi kecakapan dari IAR asingnya.

Dalam hal ada amatir radio Indonesia yang secara sukarela mengikuti ujian FCC US dan lulus, kita hormati haknya tergantung apapun motivasinya, sama seperti kita menghormati keanggotaan amatir radio Indonesia dalam forum kegiatan amatir radio internasional ataupun di negara lain. Apapun kegiatan radio amatir yang diikutinya dengan sukarela dan yang dapat

menimbulkan rasa kebanggaan dan kehormatan, sepanjang itu positif bagi perkembangan amatir radio, kenapa tidak kita apresiasi?

IA0, ANTARCTICA. Gianni, I1HYW, from <www.waponline.it> provided the following [edited]: Max, IA0MZ, did start as promise to be QRV from Mario Zucchelli Station-Antarctica (WAP ITA-01) on Sunday evening, Oct. 20th. He will be there until Feb. 2014. This morning (October 29th), Max sent a message to remind the chasers a few simple rules in order to avoid loss of precious time when he is operating HF. Max wrote: "On my second day on air, I have experienced huge pile up where unfortunately (as usual), people do not rule; all calling on everyone, many people do not even respond when I came back to their calls ... I hope that, after the first few days, things will became better, but please try to understand that

I cut hours of my sleeping time to be on for EU and please do not duplicate
the QSOs on the same band, leave everyone the chance to work MZS!
For the American friends; I'll be here until early February 2014, but
unfortunately the time between 22:00 and 02:00 UTC (that are 11:00-15:00
hrs local time here) is almost taboo for me. As you can imagine, that
falls in the middle of daily activity ... but it does not mean anything,
just a snowy day in that window will allow me to be on air even if for
half an hour or so. The advice as always, is to give an eye to the cluster,
to avoid throwing valuable time; I always use the spot quote It will not
be gallant, but I'm sure it will help the chasers..... 73 from IA0MZ,
Massimo DIPAOLA @ Mario Zucchelli Station, Terra Nova Bay Antarctica
(UTC+13) S 74°41.655' E 164°06.839'"
According to Max's QRZ.com page, activity will be on 20/17/15/12 meters
SSB ONLY. He prefers the following suggested frequencies: 14333, 18125,

NEW QSL MANAGER. Alan, 5B4AHJ, informs that M0URX has taken over the QSL duties for 5B4AHJ and P3J. However, Alan states that he will continue to manage QSLs for the older callsigns: 5B50J, 5B/G3PMR, G3PMR & others. ADDED NOTE FROM ALAN: "May I remind your readers that a large number of Cyprus stations have QSL Mangers outside Cyprus. The CARS QSL Bureau cannot deliver QSLs to these stations. Please ensure that the QSL Manager's callsign is written prominently on the card. Many cards are

received from bureau with the correct manager, but the cards still get delivered to CARS because the manager's call is not prominent. The following page lists the Cyprus stations that have managers outside Cyprus <http://www.cyhams.org/index.php/en/cars-services/qsl-bureau-service/141-incoming-qsl-cards-foreign-amateurs-a-qsl-bureaux>.
Thanks! 73 Alan, 5B4AHJ"

NOT THE QSL MANAGER/ROUTE. Petr, OK1DOT, announced last week that RW6HS is not the QSL Manager for the following DX stations. This information was gathered from QRZ.com and DX bulletins. Here is the list of stations: 4X0F, CE2EZE, CT1JSP, EA8/W4OI, EW1AR, JX7DFA, KP3EM, OD5NO, PR7CPK, SQ5OZH, TA1AZ, VK4SJP, VU2UR, YV5DEH and ZB2FK.

STANDARD TIME. Did you remember to change your clocks? Countries who observe Daylight Saving Time (DST), which took place on Sunday, March 10th, are now expected to move their "local clocks" backward 1 hour on Sunday, November 3rd, from 2:00 AM local time to 1:00 AM. In 2014, Daylight Saving Time (DST) will again go into effect on Sunday, March 9th, at 2:00 AM local time. For the history and details about ST and DST, as well as an interesting map of the world (showing the countries who observe DST), see: http://en.wikipedia.org/wiki/Standard_time
http://en.wikipedia.org/wiki/Daylight_saving_time
ADDED NOTE: Hopefully, all amateur radio operators know not to change their GMT/UTC/ZULU clocks. However, since most operators usually set their computers to local time, some may have to change their settings on "some" ham radio software (ex. logging, propagation, DXTelnet, etc..) programs.

T33, BANABA ISLAND (Reminder). The T33A DXpedition to Banaba Island (OC-018) is expected to be active this week between November 5-18th. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have six stations on the air at two different sites. A OQRS by ClubLog will be available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. For

more details, visit the T33A Web page at: http://www.t33a.com/index.htm
The T33A DXpedition's Blog page is at: http://banaba2013.wordpress.com
Also, the T33A team will be using DXA interface for their operation. DXA is an innovative Web site that allows DXers to view the status and activities of a DXpedition in near-real-time. Within a few minutes after making a contact with the DXpedition, the DXer is able to see a graphical listing of their contact. The DXA Web page for the T33A operation is located at:
http://dxa2.org/t33a
ADDED NOTE: For one day only, on November 18th, look for David, N1EMC (Co-leader), to be active from Banaba Island as T33X. QSL via N1EMC direct.

VK0H, HEARD ISLAND. It has been reported [on the Web page below] that the 2015 Cordell Heard Island Expedition Project's restructuring has been completed as of October 15th, and is grouped into three broad groups: Mountain Science, Environmental Science and Communication Science. A document, "HD_2015_Research_Program", has been completed describing the proposed projects for a 2015 expedition to Heard Island. The document will be released on 15th Nov. 2013. The Expedition's Organizer/Leader Dr. Robert Schmieder, KK6EK, will visit the Australian Antarctic Division (AAD) in Hobart, Tasmania, during Nov. 4-14th, to discuss the expedition, the scientific projects, and arrangements for transportation and onsite support. The goal is a collaborative effort between the AAD, Cordell Expeditions, and other institutions that have expressed interest in participating. Exact dates are to be confirmed soon. The team plans to be active from Agatti Island (AS-011) with the callsign VU7AG. Given the short notice, the team is working hard in getting things organized and is looking to be active for at least fourteen days. The team would be operational in batches with three high power stations running CW, SSB and RTTY. Suggested frequencies are:
CW - 1812, 3512, 7012, 10112, 14012, 18082, 21012, 24902 and 28012 kHz
SSB - 7095, 14180, 18155, 21280, 24955 and 28480 kHz
RTTY - 7032, 10142, 14082, 18092, 21092, 24922 and 28092 kHz

SPECIAL NOTES:
* The VU band allocation in the 80m phone segment is very, very narrow. It was therefore decided by the team that there would be no 80m SSB operation.
** On 20m, they will listen higher up in the band. Especially while working General class hams in the U.S.

Another callsign has been issued for demonstration purposes on Kavaratti Island □ VU7KA. This would be used only briefly when team members make presentations to the local administration in Kavaratti and educate them on amateur radio. QSL Manager is Krish, W4VKU, direct or by the Bureau (see details on the Web page). An Online QSL Request System (OQRS) will be available for all your QSL requests. OQRS will be enabled soon after the expedition. For Logbook of The World (LoTW): QSOs would be uploaded to LoTW in approximately 6 months time. The following Web page has been setup, and contains bios of operators, QSL details, frequencies and a survey. Visit the VU7AG page at: http://www.vu7ag.info

LATEST NEWS FROM KOSOVO, Z60A AND ALBANIA, ZA. Jarmo, OH2BN, sent out the following press release on November 1st [edited]: "During the recent CQWW activation of Kosovo, a project to activate neighboring Albania was

agreed jointly by members of SHRAK, Kosovo's Amateur Radio Association (Z60A) and Radio Arcala (OH8X) of Finland.
The team will be headed by Fehmi Bojniku/Z62FB and Martti Laine/OH2BH. They are seeking additional team members from USA and Japan. The operating location will be the coastal city of Durres - only a 3-hour drive from Kosovo's capital Pristina.
To simulate the upcoming ZA expedition, the Kosovo team will fire up Z60A for the first time this coming Friday (November 1) until Sunday (November 3) on the following SSB frequencies: 14210, 21310 and 28510 kHz, operating split frequency when needed. Special emphasis will be given to Japan and USA, with superb radio conditions hopefully lasting for this weekend.
The following persons - Vjollca/Z61VB, Driton/Z61DX and Fehmi/Z62FB - are heading the operations with their new hams participating. A special QSL card can be obtained via OH2BH.
This activity is supported by Emerald Hotel, Pristina.

Iya Joy, aq juga pernah menjadi 'tamu agung' di istana Grobogan..
Tuan rumahnya ramah n baik hati.. Ditambah juga keramahan dari DPP Grobogan saat itu yg kebetulan menjabat sebagai bupati...

Sayangnya jalannya tidak mendukung, pada rusak...

Mas Budi, kapan ya kita diundang sowan ke istana Grobogan lagi?

Salam sukses buat semua rekan2 di Grobogan.

9348. QUICK-START GUIDE for TQSL version 2.0

```
QUICK-START GUIDE for TQSL version 2.0
======================================

TQSL is an application used to digitally sign and upload QSOs to the ARRL's Logbook of the
World (LoTW) online service, and to manage the Callsign

Certificates used when digitally signing. TQSL accepts QSOs in a log file whose format is
either ADIF or Cabrillo, which many logging applications can create.

To digitally sign the QSOs in a log file, TQSL requires you to present a Callsign
Certificate issued to you by the ARRL, and requires you to specify the location from which
you operated when making every QSO in that log file.

To make this easy, TQSL lets you define and name a Station Location that specifies your
Callsign Certificate and operating location.

Documentation for TQSL is available via its Help menu's "Display
Documentation" command; on OS X, documentation is available via the Help
menu's "Contents" command). The information in this Quick-Start Guide is a
subset extracted from the documentation.

TQSL can be installed and executed on Windows, Mac OS X, and Linux.

Installation
============

To install TQSL on Windows, download and execute the .msi file to start the TQSL installer.
The installer makes TQSL accessible via the Windows Start/Programs/TrustedQSL menu unless
you direct it to use a different menu. The installer also provides the option of creating a
Desktop shortcut for TQSL.

To install on Mac OS X, download and open the disk image file (.dmg). and drag the
TrustedQSL folder to your Applications folder. If you are replacing an existing
installation of TQSL, you should choose "Replace All" when prompted.

On a Mac OS X 10.8 or later system, you may need to grant permission for the TQSL
application to run: right-click or control-click on the application icon, and then choose
"Open"; when an "Are you sure" dialog box appears, click the "Open" button to permit TQSL
to start. You will only need to do this when installing a TQSL release.

To install on Linux, consult the instructions in the INSTALL document included with the
source code.

If you're updating an existing TQSL installation
================================================

Note that this version of TQSL includes the Callsign Certificate management functionality
previously provided by TQSLCert; TQSLCert is no longer required, and has been removed from
```

your computer. To request, load, save, renew, or delete a Callsign Certificate, use the "Callsign Certificates" tab on TQSL's main window and its "Callsign Certificate" menu commands.

TQSLCert was by default configured to hide both "replaced" and "expired" certificates. TQSL displays all Callsign Certificates on its main window's "Callsign Certificates" tab:

- "replaced" Certificates are denoted by an A=>B icon
- "expired" Certificates are denoted by an alarm clock icon.

You should delete each "replaced" or "expired" Callsign Certificate by clicking its entry on the "Callsign Certificates" tab, and then selecting the "Callsign Certificate" menu's "Delete Callsign Certificate" command.

If you're installing TQSL for the first time
==========

1) Request a Callsign Certificate

When you start TQSL, you'll be informed that you have no Callsign Certificates and be asked if you want to request one. Choose "Yes", and proceed through the sequence of "Request a new Callsign Certificate" dialogs:

a) When prompted to specify a callsign, use your present callsign without any portable identifiers.
b) The "QSO begin date" is the date of the earliest QSO you'll submit to LoTW using the callsign you've specified; normally, this is date-of-issue for your license. Leave the "QSO end date" blank.
c) For US callsigns, your mailing address must match the address in the FCC' database. If your address is now different than what you last filed with the FCC, you must register your new address with the FCC.
d) You will be prompted to specify a password. If you're using a shared computer, you should protect your Callsign Certificate by entering the same password in both password textboxes; you'll be asked to provide this password each time you direct TQSL to digitally sign a log file, so be sure not to forget it! If you control access to the computer you're using, you can leave
both password textboxes empty, thereby avoiding the need to provide a password each time you direct TQSL to digitally sign a log file.
e) When given the option to digitally sign the Callsign Certificate request, choose "unsigned".
f) If your computer is connected to the internet, TQSL will offer to submit your Callsign Certificate Request; choose "Yes". If you chose "No", you'll be prompted to save a .tq5 file, which you should then attach to an email message to lotw-logs@..., or upload via the Web (https://www.arrl.org/lotw/).
g) If you are a US licensee, you will receive a post card in the mail with further instructions; the post card will be sent to your address in the FCC's database, so make sure that's correct! If you are a non-US licensee, you must submit proof of license and identity to receive your Callsign Certificate. See http://www.arrl.org/lotw/ for details.

NOTE! Do not delete the Callsign Certificate Request (the red-lined "pending" icon) from TQSL's "Callsign Certificates" tab after the Request has been conveyed. Each Certificate Request is unique and must match theCallsign Certificate that you will receive from the ARRL. If you direct TQSL to delete the Certificate Request, you will not be able

to load the Callsign Certificate the ARRL sends you in response.

2) Accept the Callsign Certificate

Your Callsign Certificate will arrive as a file with a .TQ6 suffix attached to an email message sent to the email address that you specified in the "Request a new Callsign Certificate" dialog.

You must accept the Callsign Certificate using the same computer on which you generated the Callsign Certificate Request in step 1 above. Attempting to accept a Callsign Certificate using a different computer will fail.

Double-click the email attachment in the received email message to launch TQSL and direct it to load the .TQ6 file. If double-clicking the attachment does not start TQSL, then save the attached .tq6 file to a folder, start TQSL, and use its Callsign Certificate menu's "Load Callsign Certificate From File" command to load your Callsign Certificate. This certificate will appear on TQSL's
"Callsign Certificates" tab with a yellow medal icon indicating that it is valid.

3) Backup the Callsign Certificate

This step is strongly recommended: if you fail to make a backup and later lose your Callsign Certificate to a hard-drive crash or operating system failure, your certificate will not be recoverable. Select the File menu's "Backup Station Locations, Certificates, and Preferences..." command, and create a backup on a flash (thumb) drive, an external hard drive, or on a cloud storage
service like DropBox, Google Drive, or Microsoft Sky Drive.

4) Request Additional Callsign Certificate

Logbook of the World treats a callsign with a portable identifier (e.g. NU1AW/4 or KP2/W1AW) as distinct from its home callsign. To submit QSOs made with a portable callsign, you must obtain a Callsign Certificate for that portable callsign.
After you have received your Callsign Certificate for your home callsign, repeat steps 1, 2, and 3 above, but
- in step 1a specify your portable callsign
- in step 1e digitally sign the request with the Callsign Certificate for your present callsign

5) Create a Log File

TQSL accepts log files saved from logging applications in either ADIF or Cabrillo format.

If you're not yet using a logging application and want to create a log file containing a few QSOs, start TQSL, select the "Log Operations" tab, and click the "Create an ADIF file for signing and uploading" button.

Because new modes may not yet be specified in ADIF, and because LoTW may not accept all modes specified in ADIF, TQSL enables you to "map" a new mode to a mode or mode group recognized by LoTW; this most often takes the form of mapping
a new digital mode to the DATA mode group. Previous versions of TQSL would allow you to map modes accepted by LoTW. This version of TQSL will refuse to map a mode that is recognized by LoTW. Any existing mappings of modes recognized by LoTW
will be automatically removed on startup.

6) Define a Station Location

Select TQSL's "Station Locations" tab and click the "Create a new Station Location" button.

A sequence of "Add Station Location" dialogs will prompt you for the location of the station used to make all of the QSOs in the log file you'll be submitting, and will enable you to specify a name that identifies the Station Location you've defined, e.g., "Home" or "Portable in EM29".

7) Digitally Sign and Submit a Log File

In TQSL, select the "Log Operations" tab and click the "Sign a log andupload it automatically to LoTW" button.

In the "Select File to Sign" dialog, specify either ADIF (.adi) or Cabrillo (.cbr or .log) format, navigate to the folder containing your log file, select your log file, and click the "Open" button. In the "Select Station Location" dialog, select the Station Location from which you were operating when you made all of the QSOs in the log file, and click the "OK" button; TQSL will digitally sign your QSOs and submit them to LoTW via the internet.

When submitting log files in Cabrillo format, previous versions of TQSL submitted FM and PH modes as PHONE. TQSL now submits FM mode as FM, and PH mode as SSB.

8) Visit the Logbook of the World Web site at https://www.arrl.org/lotw/ to view your submitted QSOs and confirmed QSOs, and to apply for award credits.

Using TQSL, you can navigate there by clicking the "Log Operations" tab's "Log in to the Logbook of the World Site" button.

9) For assistance or to report defects, send email to lotw-help@....

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
T6SM - Afghanistan; Operations beginning August 14, 2012, to current.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder to all DXCC program participants that the deadline for the 2013 calendar year ends on Tuesday December 31, 2013. In order to appear in the Annual Listing, published in the electronic version of the DXCC Yearbook, you must have your submission postmarked no later than December 31, 2013. Since the DXCC workload usually peaks around this time each year I recommend that applicants not wait until the last minute to get their submissions in. Besides being the heavy period for DXCC, keep in mind that it is also around the holidays so the post office can contribute to any delays in getting mail to DXCC." NOT THE QSL MANAGER/ROUTE (Update/Retraction). Last week we reported that Petr, OK1DOT, announced that RW6HS is not the QSL Manager for several listed DX stations in OPDX.1135. Since then, we now are reporting to disregard that information. It would seem that there is some kind of problem/feud between Petr, OK1DOT, and Vasiliy, RW6HS. Through certain sources, it has come to light that the list of stations mentioned refute the claims of OK1DOT, and even several of the stations have stated that RW6HS is their QSL Manager and are very pleased with his services. OPDX would expect when receiving information from the ham community that the details are being sent honestly and correctly, especially if the ham is well known. Apparently this was not the case.

Z21DXI ONLINE LOG (ClubLog). Tom, SP5UAF, reports: "For some years we had our own online log, but since the first Z21DXI activity in 2002 many new great HAM tools appeared. So after some emails with Mirek, SP5IXI, it was decided to upload all Z21DXI QSOs to the ClubLog. Thanks to G7VJR for all ClubLog fantastic tools and features. Z21DXI log is now available at ClubLog together with the OQRS tool (for bureau or direct cards). Log will be updated every few days.

ZC4LI LOG UPDATE. Phil, G3SWH, reports: "Just a quick note to let you know the current status of Steve, ZC4LI's, and current logs. I have uploaded to both LoTW and Club Log all the logs that I can find for: 5B4/G0LII, 5B4AHA, C4C, G0LII, G7G, G8G, M0ADU, MX0ADU and ZD8LII. There are log searches available for all these calls on my Web site: http://www.g3swh.org.uk
Steve was not an RSGB member and following the decision by the RSGB QSL Bureau not to process outgoing cards for non members, paper QSLs for this station are ONLY available DIRECT or via the OQRS facility on my Web site. I am still working on the log for ZC4LI as it consists of several hundred individual files in a variety of different formats and it is taking a lot of time to convert it to a single format. It should be available in a few weeks time. 73 for now....."

With this announcement it will give you more than ample time to study the materials for the exam. You can study them at qrz.com or aa9pw.com.
The fee is still $15 (subject to change per FCC policy).

Just a little foot note, on the last exam session we have 9 new licensees and the new callsigns have been issued a week later after the exam session had ended. So, the turn over time between the exam and callsign is issued is about 1.5 weeks.
And ..... 2 new VEs has been added to the team.

3DA, SWAZILAND (Press Release) [edited]: "The 3DA0ET Dxpedition is due to get under-way late on the 16th November or on the 17th November, depending on if we have time to get any of the antennas up on the first day. As a new feature, we have installed a 'Dxpedition Hot-line' phone number which connects to our pilot. The number is listed on our Web site at: http://www.swazidx.org
The purpose of this hot-line is primarily for sending SMS messages about any copy on our new six meter beacon which will be running 24/7 on 50.450 MHz FM (primarily for Es as part of the Southern Africa Es beacon initiative), and for sending us any reports re RX of our low-band activities. Details about how we will handle any six meter openings are also on our Web site. The first of our team members arrives in South Africa on the 12th November, with the rest of the team assembling in ZS-land prior to departing for 3DA0ET by the morning of the 16th November. A reminder that we'll have a strong focus on RTTY with a 24/7 RTTY operation alongside our CW and SSB activity. We are also QRV in the CQ WW CW contest as an M2 effort. We're running 5 stations with 4 hexbeams, 3 mono-band verticals for 40, 80 and 160, dedicated low band RX antennas and a selection of dipoles. We hope to see you in the pile-ups!

All radios, amps, antennas and trinkets are packed and ready for things to start. I leave

Dutch Harbor, Alaska, in the morning Sunday at 10am local time heading to Seattle to take part in the North Pacific Fishing Trade show, and then depart to Honolulu on Sunday, the 23rd, spend a day or two catching up with some of the KH6 guys before departing on the 26th to Kiramati. I will then set up the radio equipment, and then it is on from the Captain Cook Hotel. Band conditions are great so will be operating the high bands during the day light and low bands at night. The rest of the crew T32RC are also almost packed up, and we have some very good antennas for the low bands with us, especially for the 160m contest and the rest of the time. Remember, this is not a huge DXpedition and any small amount of donation to the Web site <T32-2013.com> will be very much appreciated to help with the excess baggage costs of the antennas and radios. Thanks in advance. .....T32TM and T32RC crew Tim NL8F"

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network OH2BH, OH2BN and JA1TRC for the following DX information.

XZ1J (Press Release). XZ1J - Update Nov. 17, 2013:
The XZ1J Team members are operating from two Camp Site locations about 300' apart; CW Camp and SSB Camp.
The SSB Camp has two stations; one with a Spider Beam covering all bands and the 2nd station is using 1/4 vertical antennas for 12, 17 and 40 meters.
The CW Camp has three stations; the 1st station has a Tri-Band Beam (10, 15 & 20) and the 2nd station is using 1/4 verticals for 40, 30, 17 and 12 meters plus an Inverted L for 160 Meters (abt 80 vertical and 47' hortizonal). The third station is mainly used for 30 meter CW and 20 meter RTTY when time permits.
Our efforts on 160 meters started last night and ended this morning around 6:00 AM with many QSO's in the log. We'll be on 160 and/or 80 meters all night; sunset to sunrise.
During our second day, we had to move the SSB Camp site to reduce the S9 noise level from a local power line. The new location has minimum QRN.
This evening, we'll update our Operating Frequency Chart to eliminate some of the interference with several other DX-peditions. This data will be updated to the http://www.xz1j.org/ website and http://www.k3lp.com/xz1j_2013.htm
Both Zorro and Jay have our team working hard to get the QSO's in the log. QSLing is via Zorro's QTH or http://www.qrz.com/ for XZ1J.

Z81X JUBA, SOUTH SUDAN (Two Press Releases).....

NEWS FROM SOUTH SUDAN, SUNDAY 17-NOV-2013

What a wonderful occasion it was when twenty-one Ministry of Telecommunication and Postal Services administrators, led by Director General Meshack Madol Yol, arrived for a full-day Amateur Radio training session organized by International Amateur Radio Union (IARU) R1 and Radio Arcalas Mission Goodwill South Sudan. The session was conducted by Hans, PB2T, IARU R1 President together with Wayne, N7NG and Martti, OH2BH. The memorable

occasion took place at the European Union compound in the capital Juba.
A joint working group was formed and the day was capped with the interview
by local broadcasters in the nation's capital.
The program is sponsored by IARU R1, ARRL, EUDXF, DX University and
YASME Foundation. The next day and with some 600 QSOs under his belt,
Hans departed to resume his subsequent duties at ITU in Geneva.
The low-band operation also got underway for the first night with no
receiving antennas but 160M and 80M verticals gave a good start, with a
full footprint for the United States and the first 50 JA station logged
on the first shot indicating the same for the Far East. Now both directions
are also covered by beverages. It is now expected that 160, 80 and 30M will
be active every night on CW for the next six days and then providing an
80M SSB toward the weekend.
The team of Dietmar, DL3DXX; Wayne, N7NG; Pertti, OH2PM; Olli, OH0XX,
Martti, OH2BH and Veijo, OH6KN with valuable support from Diay, Z81D and
Massimo, Z81B are at the controls.
They use three Yaesu FTdx3000s with no interaction between the bands
in operation. Yaesu is their radio provider while Acom and Italian SPE
amps are employed on the low bands.
With the low-band QSO total now exceeding 2000, it is also noted that
both nights were different with regard to the overall propagation profile.
Therefore one bad night may be followed by a good night, requiring a sharp
ear and great patience. So far the split is Europe 67%, NA 19% and ASIA 13%.
Logs are now uploaded at ClubLog for first two days along with Z81X
QSOs of May. 2013 at www.qrz.com/db/Z81X.

18-NOV-2013

LAST NIGHT AT Z81X

It may be interesting to note that some infrastructure is still missing
in the Republic of South Sudan. There is no electricity grid or running
water in the capital. Also, the postal system is not yet established and
many issues need to be improvised. Getting fuel for the generator is an
arduous task and more recently fuel has been in short supply in the whole
country.
There was to be enough fuel for the generator but running it was ruled
out suddenly. It was 3AM just at the peak of low-band action when elec-
tricity was switched off, leaving the operators and the pileup idling.
This happened when the going neared its climax.
So, negotiations are underway and we kindly ask for your understanding.
Sometimes these basic services are taken for granted. The team are cramped
in three small huts with all their belongings, including the radios, but
hopefully we will soon gain access to larger premises as promised initially.
It is extremely hot and thunderstorms are expected to bother us during
the week; hence lightning arrestors are mounted on all cables. No equipment
or men are lost in the process and all radio gear remains in good shape.
The antenna farm is soon complete and we just need more fuel to keep
running. Why don't we go to the petrol station? We have not seen one with
a supply of diesel fuel.

In life, things are relative --- and in DX even more so. Hopefully see you tonight!

Team at Z81X

Thanks for all the reports on email, but I only got two in the log: KH2L and K7CA. I was very disappointed as I had hoped for a lot of 60m Q's. I was only able to read your email after my shift was over. On this note I do want to thank everyone for the QSO's on all the other bands. My equipment was a K3 to a Inverted Vee. The radio and antenna worked great, but I had a solid S9 to 15 over noise level most of the time. On channel 5, we had the radar which is very loud in the Pacific. My noise may have been generated from the island power plant located about 1000 feet away. Thanks for all your efforts in getting up late at night and listening for my signal. I understand as I have done it myself many times."

Africa, members of the gang at Z81X have been spared many potential problems. With only a few rain showers experienced, main outdoor activities were completed in record time, and no rain or mud is bothering further efforts. But even more important, mosquitos spreading malaria are few and far between. However, team members use mosquito nets --- to keep out mosquitos during the night hours.
Agreement was reached on power, and night time juice is now available with extra compensation agreed for the cost of fuel. Also, with some private space added, life is now so much better than at the outset.
Regarding the radio mission, initial low-band (160 and 80M) targets - 1500 and 2500 QSOs respectively - are exceeded with a total of 933 USA and 595 JA QSOs on those two bands, but every effort will be made to push the numbers even higher tonight before contest traffic takes over all bands on CW.
During the contest weekend, the team will have two dedicated stations with a focus on 80 and 40M SSB and the still much needed 30 and 17/12M. Keep an eye on those bands as the Z81X crew will keep running there DXpedition style.
The CQWW CW contest will see the team making three (3) single-band entries for your Zone 34 multiplier pleasure:
Z81R by OH2PM on 10M, via OH2BH
Z81X by OH0XX on 15M, via OH0XX
Z81Z by DL3DXX on 40M, via K4ZW
As these efforts are only semi-serious, you shouldn't be surprised to see one of the Z8s appear on other bands as well.
There will be pictures available of this operation on the Z81X QRZ.com page later today.
Following the weekend, site tear down will start on Monday and the team will be heading home on Tuesday.
Best regards from the newest African country, the Republic of South Sudan."

ARRL membership certificates commemorating the League’s 100th anniversary in 2014 now are available. Members logged onto the League’s website can generate their own certificates or cards online for printing. “We want each ARRL member to know that he or she is a part of next year’s big ARRL Centennial,” says Membership Manager Diane Petrilli, KB1RNF. The certificate maker also produces a replacement membership card. The ARRL thanks past McGan Award winner Angel Luis Santana, WP3GW, for suggesting the 2014 ARRL Centennial Membership Certificate, which was designed by ARRL Graphic Artist Diane Szlachetka.

http://www.arrl.org/news/the-arrl-centennial-qso-party-starts-january-1-2014

In conjunction with the 100th anniversary of the ARRL, the ARRL Centennial QSO Party is set to kick off January 1 for a year-long operating event in which participants can accumulate points and win awards, as well as working new stations and making new friends. During 2014 W1AW will be on the air from every state (at least twice) and most US territories, and it will be easy to work all states solely by contacting W1AW portable operations. This marks the first ARRL-sponsored operating event where every member is worth at least one point. The event is open to all, although only ARRL members and appointees, elected officials, HQ staff and W1AW are worth points. Working ARRL's president, for example, earns 300 points!
To qualify for points all contacts must be two-way (no cross-band or cross-mode contacts), using CW, phone (FM, SSB, AM, digital voice), digital (any digital mode, such as PSK31, RTTY) on 160, 80, 40, 30, 20, 17, 15, 12, 10, 6, 2 and 1.25 meters, plus 70 centimeters and satellite.
Stations exchange signal report and ARRL abbreviation. Contacts do not have to be contest-style and it isn't necessary to give the ARRL organizational information. A centennial database will assign point values to all logs submitted electronically. Those not submitting electronically, however, will need to obtain the QSO information during the contact. This event is not a contest, so participants may make contacts in any fashion they prefer.
The Centennial QSO Party is scored by totaling the values of all eligible contacts. There are no multipliers or bonus points. Logs submitted via Logbook of the World (LoTW) will be scored automatically.
Awards
Work W1AW operating portable from all 50 states. Working W1AW or W1ØØAW in Connecticut does not count for Connecticut, however. Participants can earn W1AW Connecticut credit only for working W1AW/1 in Connecticut. A W1AW WAS certificate and plaque will be available (pricing not yet announced). For an extra challenge, work all 100 W1AW portable operations — essentially a double WAS with W1AW!
Endorse the W1AW WAS Certificate with the Territorial Stickers for working W1AW/KH2, W1AW/KP4, W1AW/KP2, and any others that may be active, and also endorse with W1AW/3 from the District of Columbia (stickers are $1 each)
Centennial Points Challenge
To compete in the Centennial Points Challenge, submit logs via Logbook of the World (LoTW). The system will automatically look for points-qualifying contacts from submitted logs and apply them to each participant's Centennial QSO Points table. QSOs do not have to be matched in LoTW for points to be achieved — this is an honor-based event. No paper forms or information will be accepted for the Centennial Points Challenge, however. Some points worth noting:
Club call signs do not count for points.
Repeater contacts are not valid for credit.
Mobile and portable operations are okay but do not count for points in addition to home operation — ie, a contact with KØGW counts for KØGW, whether it is made with KØGW/4, KØGW/m, or PJ4/KØGW.
Stations outside of the US may also count for points. More than 10,000 ARRL members live

outside the US, and some of these are also volunteer examiners or DXCC card checkers. ARRL appointees, staffers, and officers should choose for their contact exchange the appointment or office held that offers the highest point value (this is how the database will work also). For example, KI9XX is an ARRL Life Member (a LM is worth 2 points), a Volunteer Examiner (VE is worth 5 points) and a State Government Liaison (SGL is worth 30 points), so KI9XX should use “SGL,” since that offers the highest point value. In any event, the database will give credit for the proper point value.
The top-scoring operator from each ARRL Section, Canadian Province and DXCC entity will receive a First Place certificate. The Top Five overall point scorers will receive awards. There is a charge for award certificates. For complete information, visit the ARRL Centennial QSO Party web page. Contact us if you have questions.

Objective
The ARRL Centennial QSO Party is a year-long operating event that celebrates hams making contacts. In the end you will have accumulated points, worked new stations and made new friends all over the world. W1AW will be on the air from every state and most territories, and it will be easy to work WAS working only W1AW portable operations. This is the first ARRL-sponsored operating event where every member is worth at least one point, so work as many points as you can during 2014! Earn awards based upon points, working all states or working W1AW portable in every state and territory. This is an on-the-air event like no other.

QSO Information Exchange
Many stations will try to keep their QSOs short and at a minimum the exchange is signal report and ARRL abbreviation (See Centennial QSO Points Table).QSOs do not have to be contest style and it isn't necessary to give the ARRL organizational information. There is a Centennial database that will be used to assign point values to logs submitted electronically. For those who do not use electronic submission, they will need to obtain the QSO information from their contacts. This event is not a contest, so feel free to make contacts in any way you like. If you are the station looking for QSOs, try to operate with the same style as the station you contact.

Scoring
The Centennial QSO Party is scored by totaling the values of all the eligible QSOs completed. Eligible QSOs may be made with the same station on each band mode -- i.e., N6VI may be worked for points on 20 Meters CW, 20 meters SSB, and 20 Meters digital, and the same on bands where multiple modes are used. Essentially each different station may be worked on each of the mode groups on each band with the exception of 903 MHz and higher, and the satellites. There are no multipliers or bonus points. See the Centennial QSO Points Table for the complete list of QSO values. Logs submitted through the Logbook of the World will be scored automatically.

Awards
* Worked all States with W1AW: Work each of the 50 states with QSOs with W1AW operating portable. W1AW/7 in Arizona counts for Arizona; W1AW/2 in New Jersey counts for New Jersey, etc. W1AW or W100AW in Connecticut do NOT count for Connecticut. Connecticut credit is given only for working W1AW/1 in Connecticut. A W1AW WAS certificate and plaque are available for in the US and outside the US (Pricing coming soon).

* For an extra challenge, work each of the 100 W1AW portable operations – essentially a double WAS with W1AW!
* Endorse the W1AW WAS Certificate with the Territorial Stickers for working W1AW/KH2, W1AW/KP4, W1AW/KP2, and any others that may be active, and also endorse with W1AW/3 from the District of Columbia. Stickers are $1 each

Centennial Points Challenge
In order to compete in the Centennial Points Challenge, logs must be submitted through Logbook of the World (LoTW). Logs do not need to be changed from the normal Cabrillo (contest logs) or ADIF (general logging file) files. The system will automatically look for points-qualifying QSOs from submitted logs and apply them to each participant's Centennial QSO Points table. QSOs do not have to be matched in LoTW for points to be achieved – this is an honor-based QSO Party. We cannot accept any paper forms or information for the Centennial Points Challenge.

* Club call signs do not count for points.
* Repeater contacts are not valid for credit.
* Mobile and portable operations are OK, but do not count for points in addition to home operation unless the operation takes place from another DXCC entity ; i.e., one QSO with KØGW counts for KØGW, whether it is made with KØGW/4, or KØGW/m. PJ4/KØGW counts for points separately as this operation was from the DXCC entity of Bonaire.
* Stations outside of the USA may also count for points – there are over 10,000 members outside the USA! Some members outside USA are also VEs and Card Checkers.
* ARRL appointees/staff/officers should choose for their QSO exchange the appointment or office held that is the highest point value (this is how the database will work also). E.g. KI9XX is an ARRL Life Member (LM is worth 2 points), a Volunteer Examiner (VE is worth 5 points) and a State Government Liaison (SGL is worth 30 points), therefore if he wants to send the appointment information as part of a QSO he should use SGL as that is the highest point value. Regardless of what designation is chosen for use, the database at HQ will give credit for the proper point value.

The Top Scorer from each ARRL Section, Canadian Province and DXCC entity will receive a First Place certificate. The Top five overall point scorers will receive awards.
* Centennial QSO Party certificates are available for making QSOs with point-level achievements at four levels. These certificates are endorsable every 500 points. Plaques are available for Third and Top Levels. Point breaks for each level will be determined at a later date.
* xxxx points = First Level Award Certificate
* xxxx points = Second Level Award Certificate
* xxxx points = Third Level Award Certificate
* xxxx points = Top Level Award Certificate
* Awards are offered for completing QSOs and compiling points during the Centennial QSO Party. Awards applications may be made online or by completing paper forms and submitting them to ARRL HQ. USA certificate prices:
* Each award certificate costs $15.00 (including postage) in the U.S.A
* Two certificates ordered at the same time costs $27 (including postage)
* Three certificates ordered at the same time costs $39 (including postage)
* Four certificates ordered at the same time costs $51 (including postage)

* Outside the USA certificate prices:
* One certificate costs $20.00 (including postage) outside the USA
* Two certificates ordered at the same time cost $36.00 (including postage)
* Three certificates ordered at the same time costs $52.00 (including postage)
* Four certificates ordered at the same time costs $68.00 (including postage).

QSLs

QSL cards from W1AW and W1AW operating portable will be sent automatically via the QSL Bureau system to each U.S.A. station who signs-up online to receive such cards [this form is not ready yet -- please watch for an announcement]. This is a one-time only use of the QSL Bureau for this purpose. QSLs will automatically be sent to stations outside the U.S.A. via the QSL Bureau as normal. QSLs may be requested directly also, with an SASE required for return.

Dear fellow ham radios,

Hereby, we would like to notify you all that the next FCC/ARRL exam will be held in Bogor at the ORARI Seklok Bogor, on January the 19th, 2014 (Sunday) at 10 am sharp.

For those who would like to take the exam please register yourself as soon as possible.
At this time, we still can't take walk ins, due to the limited of man power.

The exam fee is still $15 per try (subject to change per FCC rules), upgrading to the next level after you passing the lower level below it it's always free of charge.
That's also include your license fee, which is good for 10 years.

A more detailed information will be emailed to those who already registered only.

Thank you very much for your interest in obtaining a US callsign.

On behalf the ARRL VE team, 73

AK4HW, KC8PPD, AB2QV, AC2MA, AC2MB & W7NZ

Om Zen ,,

Boleh nanti saya kirimi,
Tapi sebelumnya om Zen ƀišª lihat dulu rulesnya di web REF.

Award ini harus minta verifikasi oleh organisasi pusat,
Kemarin aplikasi saya , dibantu oleh om YB1GJS..

Fee award semuanya lebih dari 50 irc.. (4 award)
Kebetulan masih punya IRC yg hampir Exp..
Jadi dipergunakan untuk award ini om Zen,

Saya waktu itu gak ngajuin medal nya - IRCnya waktu itu kurang cuma punya 15IRC, kalo sama medal perlu 24 IRC.
Belakangan baru tahu kalo di kantor pos poasar baru stock banyak.

DTA dari REF juga bagus tuh awardnya berwarna biru.

OM Ndut,
Coba aja tanya ke Bill Moore-NC1L, dia mungkin sudah gak heran lagi kalo ngirim lapel pin ke Indonesia sering hilang. Apalagi kalo cuma lapel pin dalam amplop cilik - waktu itu saya terima dlm amplop casing kuning seukuran amplop QSL card diisi plastic bubble.

Insya Allah dia akan kirim, asal jangan minta PIN ATMnya atau PIN rahasia lainnya. HI

OM Djoko,
Awal saya apply DXCC dulu gak tahu soal lapel pin itu, lalu saya dapat informasi bahwa sebenarnya dapat utk award awal itu. Saya lupa info dari mana, dan kenapa award pertama saja dsb dsb.

Akhirnya saya tanya ke Bill, katanya memang dia kirim award plus lapel pin dan kalo gak ada di tabung award itu berarti hilang di kantor pos negara anda... (waduuh...).
Akhirnya dia kirim ulang dan sampai, sedangkan pin utk 10M, Phone, Mixed (polos) saya pesan tersendiri.

OM Zen,
Ini saya berikan contoh GCR yg saya buat, waktu itu karena gak ketemu dengan OM Gjelani/YB1GJS lalu saya print ulang dan minta tandatangan OM Yoyok-YB0ECT.

1. Form ini dilampiri dengan semua QSL card seperti yg tertera di GCR, setelah ditandatangani lalu form itu (tanpa QSL card) kita kirim ke REF plus biayanya. Waktu itu saya kirim IRCs.

2. Daftar nama award manager - callsign dan alamat emailnya.
3. Daftar award fee
4. Surat balasan dari REF plus lampiran 2 lbr
5. Award D-U-F dan DUF Excellence ---> ini gak usah karna pernah saya upload

Waktu itu konfirmasi dari Monaco, Andorra, Chad, Commoros,St.Martin, belum ada jadi gak bisa jadi tambahan.

Silahkan dipelajari dan disiapkan utk pengajuannya.

Setahu saya, pin pertama pun mesti bayar kalau tdk salah $10.
Kalau mau order biasanya ditulis di note waktu apply dxcc,

Rasanya kalau OM nDut mau order bisa email saja ke Bill Moore OM nDut, dan kasih info cara pembayarannya. Mis Credit card number dsb.

Pin yang gratis cuma waktu yg pertama klaim dulu - yg DXCC berikutnya tanpa pin.
Harus bayar utk pin -nya.

Dear Budi

OK, many thanks for the information. We are amending the Directory listing for OC-272 to include Kisar Island and deleting it from OC-246.

Please let me know the exact dates of your operation when they are firm.
As with your operation from OC-275, we will need validation material including evidence of presence on Kisar Island.

Wishing you all best wishes for the success of your operation.

Special Bulletin 13  ARLX013
From ARRL Headquarters

To all radio amateurs

SB SPCL ARL ARLX013
ARLX013 ARRL Granted Use of W100AW for League's Centennial

The FCC has authorized the Maxim Memorial Station W1AW to also use
the call sign W100AW during 2014, the ARRL's centennial year.
Contacts made from the Maxim Memorial Station in Newington, from
regional Centennial conventions, and during the IARU HF Championship
will use W100AW, with portable designators as appropriate. The "W1AW
WAS" operations throughout 2014 from each of the 50 states will use
W1AW, not W100AW.

Bulletins and code practice transmissions during 2014 also will
still use W1AW. Contacts with W100AW will be worth 100 points in the
ARRL Centennial QSO Party. To help kick off the ARRL Centennial,
special W100AW activity will begin at 0500 UTC on January 1, 2014
(midnight in Newington), and will include participation in ARRL's
Straight Key Night; one CW station will use Hiram Percy Maxim's
straight key. Activity will continue throughout New Year's Day.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA. The "DXCOFFEE" Web page is reporting that activity from 1A is planned between January 2-7th (2014). Look for more details to be forthcoming.

5V, TOGO. Philippe, F5MVB, is planning to be active as 5V7MP from Togo next year. Look for more details to be forthcoming in January.

5X, UGANDA. If you missed Alan, G3XAQ, as 5X1XA from the capital city of Kampala, he is expected to return again and be active between February 25th and March 16th (2014). Activity will be CW only. He will also be in the RSGB Commonwealth Contest (March 8-9th). QSL 5X1XA via G3SWH.

8P, BARBADOS (Reminder). Operators Mike/KI1U (8P9IU), Mike/N1TA (8P9TA) and Bruce/K0BJ (8P9BJ) will be active from Barbados between December 9-16th. Their main activity will be the ARRL 10 meter Contest (December 14-15th) and will sign as 8P8T. QSL via KI1U. Prior to the contest, operators will be using their own callsigns.

9H, MALTA. Leo, DJ7PR, is once again active as 9H3YQ from Malta (EU-023) until December 11th. Activity is holiday style and has been mostly 40 meters CW this past week. However, Leo informs OPDX, "My antenna is a small vertical for all bands built up on my balcony and I only work CW. With 100 watts and CW, it works perfect. Also for DX. My working hours are mostly in the evening which means 1700-2300 GMT and mostly 20m and 40m. I don't think it is a good time for USA. I also try 10m between 0900 and 1200 GMT if the band is open." QSL via his home callsign.

9Q, DEM. REPUBLIC OF CONGO. Earlier in the week there were a few reports stating that after 3 years of negotiations with the Congolese government and official approval from the Ministry of Telecom (ARPTC) the national club station 9Q0AR and its special callsign 9Q0HQ were finally given permission to operate again. This would be great and also the first legal activity from 9Q-land in several years. On QRZ.com (under 9Q0AR) it suggests to listen on 21310 kHz between 1000-1400z.

A3, TONGA. Operators Klaus-Dieter/DK1AX and his XYL Heidi/DK1MA will be active as A35AX on a holiday style DXpedition from Tongatapu Island (OC-049) and Vava'u Island (OC-064) between February 24th and March 7th (2014). Activity will be on CW, SSB and RTTY. QSL via the OQRS on ClubLog.

CT8, AZORES. Siegfried, DF9WB, is now active as CT8/DF9WB from (EU-009) until December 18th. Activity has been on 20/15/10 meters SSB. QSL via his home callsign, direct or by the Bureau.

HK0, SAN ANDRES. Tim, LW9EOC, will be active as HK0/LW9EOC from San Andres Island between April 18-25th (2014). Activity will be on 80-10 meters using CW and SSB. QSL via LW9EOC.

INDEXA NEWS (PRESS RELEASE #2 - Additional Support For The Amsterdam Island DXpedition): "Hello fellow DXers and INDEXA Members: The officers of the International DX Association, INDEXA, have agreed to send an additional donation of 2,500.00 USDs to the Amsterdam Island, FT5ZM, DXpedition team. INDEXA's financial support for this DXpedition has now grown to 10,000.00 USDs. Our membership of worldwide DXers has been generous to us this year with donations. Thus, INDEXA felt further support to the FT5ZM team was appropriate.
It is now just over one month before this international team of DXpedi-

tioners leaves home for many weeks of DXpeditioning from a harsh environment. All of this to give out a new DXCC entity or band country to DXers worldwide. Certainly many will send in a contribution with their QSL card or required OQRS contributions, but the team could certainly use additional funding now.
INDEXA would like to thank our members for supporting us this year. We hope our DXpedition support has added to your DXCC account this year and other DXpeditions that are planned next year.
Support INDEXA via the web at <www.indexa.org> and your membership supports many annual DXpeditions to rare locations.
Regards, INDEXA Officers:
Gary Dixon, K4MQG, President
John Scott, K8YC, Vice President
Dick Williams, W3OA, Secretary-Treasurer
Bill Jennings, W4UNP"

QSL YB4IR/4 via his home callsign (see QRZ.com), by the OQRS, LoTW and QSL Bureau. QSL YB8XM/p via his home callsign (see QRZ.com). Donations are excepted via the PayPal account of <yf1ar@...>. Visit their Web site at: http://www.yf1ar.com/2013/12/kisar-island-oc-272-new-iota.html

SA-008. The Santana de Fora Island ZW5W operation was cancelled this past weekend due to bad weather. No word on when or if it will

be rescheduled.

CE, CHILE. Roberto (Bob), YV5IAL, will be active as CE2/YV5IAL from Chile between January 2-30th (2014). He plans to operate PSK31 daily on 14070.15 and occasionally on 10, 15 and 40 meters (PSK31 and SSB). QSL via his home callign, direct or by the Bureau.

E6, NIUE (Reminder). By the time you read this, operators Alan/VK4WR and Graeme/VK4FI will once again be active as E6RQ and E6SG, respectively, from the Coral Gardens Motel, Alofi, Niue (OC-040), until December 17th. Activity will be on the HF bands. Alan informs OPDX [edited], "Our operation is primarily for 6 meters as we are going in the middle of the southern hemisphere sporadic E season. Hopefully, there will also be TEP into Asia and who knows what else on the magic band. We will have some HF, am taking an OCF dipole for 40 through 10 meters and plan to have a play in the ARRL 10meter Contest. 100 Watts only." QSL both callsigns via VK4FI.

FO/A, AUSTRAL ISLANDS. A group of six operators from the UK will operate from the Island of Raivavae in the Australs (OC-114) between March 20th and April 1st (2014). Activity will be on all bands using CW, SSB and RTTY. The operators are Don/G3BJ, Chris/G3SVL, Nigel/G3TXF, David/G3WGN, Don/G3XTT, Hilary/G4JKS and Justin/G4TSH. They plan to run up to three stations, each consisting of a K3 plus amplifier. Antennas will consist of various vertical systems on the beach. The team will upload logs to Clublog, and bandwidth permitting, will also be uploading to LoTW as the DXpedition progresses. QSL will be handled by G3TXF and requests can be made directly or via the Clublog OQRS facility. After the DXpedition most members of the team will be attending the International DX Convention at Visalia. A Web site will be launched with further details once the callsign and other details are confirmed.

J3, GRENADA. Bob, G3PJT, will once again be active as J34G from Grenada (NA-024, WLOTA 0718) between March 3-10th (2014). Activity will probably be holiday style using a K2 w/100 watts and vertical antennas. He plans to also be in the RSGB's Commonwealth Contest (March 8-9th). Look for him outside of the contest, especially on 80 and 30 meters. QSL via his home callsign.

JW, SVALBARD (Update to OPDX.1139/Callsign). Alex, PY2SEX/DL1NX, informs OPDX that he just got permission from Norwegian Post Communication Authority to use his home callsign as LA/PY2SEX and JW/PY2SEX. HK1/CO8ZZ QSL ROUTE. Raúl, CO8ZZ, reports: "I'm just back home from Colombia...!!! I had the great privilege to be active as operator from HK1NA MM effort during CQWW on CW, thanks to a kind invitation from Jorge/HK1R. At the same time, I made several QSOs as HK1/CO8ZZ, the QSL via for those contacts are my manager DK1WI, who is already printing the cards."

T33A LOG/QSOS UPDATE. The T33A team has just compiled the final logs from the island and uploaded them to Clublog on November 29th. This upload does not reflect corrections that are presently being made via the inquiries sent to the QSL Manager. The QSL Manager is working to clear all the inquiries and then will upload that new file upon com-

pletion. He expects to clear all inquires by mid to late December and will upload that file. To those with missing calls or possible busted calls, they'd recommend patience prior to making an OQRS request and allow the QSL Manager to complete the inquiries that he receives. Please visit Clublog occasionally to see if the corrections have been implemented for those with inquiries. The E-mail for contacting the QSL Manager (W2IJ) is <Banaba2013@outlook.com>. To all with questions please forward your concerns to that E-mail address. He has now begun to respond to those inquiries. The QSLs won't be ready for at least 6-8 weeks.

ZC4LI UPDATE. Phil, G3SWH, reports: "I've at last finished importing all the hundreds of individual log files into a single file and uploaded it to both ClubLog and LoTW. I'm afraid that it is obvious that there are a number of log files missing, although I have managed to recover some 312,000 QSOs. The QSO data that is available is fully searchable at: http://www.g3swh.org.uk/zc4li.html
PLEASE check the online log before requesting QSLs, as I will be unable to confirm any QSOs that are not in the log. Also, please note that, following a decision by the RSGB QSL Bureau not to process outgoing cards for non members, paper QSLs for this station are *ONLY* available DIRECT. OQRS is much preferred. Replies to QSL requests received so far will be mailed within the next few days.
73 for now.... Phil Whitchurch, G3SWH and AD5YS"

RADIO ARCALA LANDSCAPE IS ONE SHORT (Press Release dated December 6th). Jarmo, OH2BN, reports: "While driving to the Arctic region north of the city of Oulu at 65degrees North, you will now find the wintry landscape more naked than before. Something is missing from the landscape, a reflection of the challenges facing the stormy and icy North. Sorrow has descended on the population of the village of Arkala.
It was the recent storm Oskari creating gusts of up to 68 knots (78MPH) that not only knocked down the massive 330ft (100m) 40+ ton 160/80M array but also left 200,000 homes in Finland without electricity. The mammoth structure collapsed peacefully, not hitting any of the other six towers, not hurting people or damaging buildings.
As professional engineering efforts had up to now ensured the survival of this 5-year old structure, inspectors are busy trying to evaluate the cause of the failure. It is suspected that automation designed to enable

the array to find its most comfortable position in high winds somehow locked up and caused the structure to corkscrew. Consequently the giant crumbled down on its on base just like the WTC building in those other sad years.
But life goes on at Radio Arcala at OH8X and you may soon hear Santa Claus from the North of Finland bringing you the joy of Christmas in the form of OF9X, beaming over the North Pole on 20 meters and capitalizing on the famous Polar Path during the Holiday Season.
Thank you for your interest in Radio Arcala and many of its unforgettable endeavors. In summary, we would like to share with you this short poem and these consoling words of wisdom from the late Professor Hugh Cassidy, WA6AUD: 'The grief we feel we cannot tell. A sad day it was as our tower fell.'" A picture is available in the HTML format version of the OPDX at: http://www.papays.com/BoyResting2.jpg

RI20, SOUTH SHETLAND ISLANDS. To celebrate the 20th anniversary of the Russian Robinson Club (RRC), RRC club members/operators Alexander/RW3RN (RRC #256??) and Oleg/UA3HK/ZS1OIN (RRC #349) will be active as RI20ANT from the Russian Antarctic station "Bellingshausen" on the Island of King George (AN-010) between December 17-31st. Activity will be mainly on 20 meters using CW and SSB. Equipment is a Yaesu FT-1000MP transceiver and an all band antenna. QSL via RW3RN. At the Bellingshausen station, the beacon RI1ANG works around the clock on frequency 14101 kHz. If the beacon is heard, you can then callsign RI20ANT on frequency 14160 kHz ± QRM. For more information about the Russian Bellingshausen station, read the article written by its chief Oleg Neruchev (RI1ANU) "Antarctica, 58th RAE" in the journal "Radio" issue number 10 dated 11/2013 at: http://www.radio.ru
QSOs with RI20ANT count for the "Russian Robinson Club - 20 years" Jubilee Diploma and are worth 3 points (repeatable on different bands), and count for the rule of having one mandatory contact with the main jubilee callsign R20RRC. Those who did not make the contact with R20RRC have a chance to make it before the end of the year with RI20ANT. Rules for the RRC-20 diploma can be seen on <http://www.robinsons.ru/>.

T32, EAST KIRIBATI (Update). The T32RC is currently active from Christmas Island (OC-024) until December 11th. Activity is to celebrate the 12th anniversary of the Russian Robinson Club. Operations are on 160-10 meters using CW, SSB and RTTY. QSL via ClubLog's OQRS (preferred) or LoTW (6 months after operation). Also QSL via N7RO, direct or by the Bureau. No eQSL. For more details and updates, visit: http://www.t32-2013.com

W100, UNITED STATES (Special Event). A special ARRL bulletin (ARLX013) reports: "The FCC has authorized the Maxim Memorial Station W1AW to also use the call sign W100AW during 2014, the ARRL's centennial year. Contacts made from the Maxim Memorial Station in Newington, from regional Centennial conventions, and during the IARU HF Championship will use W100AW, with portable designators as appropriate. The "W1AW WAS" operations throughout 2014 from each of the 50 states will use W1AW, not W100AW.

Bulletins and code practice transmissions during 2014 also will still use W1AW. Contacts with W100AW will be worth 100 points in the ARRL Centennial QSO Party. To help kick off the ARRL Centennial, special W100AW activity will begin at 0500 UTC on January 1, 2014 (midnight in Newington), and will include participation in ARRL's Straight Key Night; one CW station will use Hiram Percy Maxim's straight key. Activity will continue throughout New Year's Day."

XW, LAOS. Champ, E21EIC, will once again be active as XW0YJY from Vientiane between December 12-17th. Activity will include the ARRL 10M Contest (December 14-15th) as a Single-Op/Mixed-Mode/Lower-Power entry. Operations before and after will be CW on 80-10 meters. QSL via E21EIC or OQRS (ClubLog) and LoTW. No eQSL. Visit it his FaceBook and Web page at:
https://www.facebook.com/SomChamp
http://www.e21eic.net/index.php

ZF, CAYMAN ISLANDS. Pete, K8PGJ, will be active as ZF2PG on the sunny Grand Cayman Islands (NA-016) during the week of January 11-19th (2014). Activity when not diving will occur on 10 thru 20 meters SSB during the morning and afternoons on weekdays, and he hopes one night on 40 thru 160 meters. Pete plans to activate the Caymans for the NAQP Contest on 10 thru 160 meters. LoTW will be utilized and QSL to his home callsign.

Subject: 6m from Kisar Island in PI31pv?

Hello!

I see that you are planning to operate on digital modes, and am very interested in learning what antenna you take for 6m. Often, island operations provide excellent view out over the water and if you have a good view to the east over the water, I am very interested in running a JT65A mode sked with you on 6m during your moonrise. EME CNDX are VERY GOOD during your trip!!! I have attached a file showing your moonrise times ;-)

I usually run my 6m EME skeds on 50.190, and I TX FIRST sequence JT65A mode. I also monitor the ON4KST EME CHAT page, so we can make last minute frequency changes if you find you have any birdies on the planned frequency:

http://www.on4kst.org/chat/login.php?band=5

As you may know, JT65A is a special weak signal digital mode that was especially developed for EME ("moonbounce") communications. JT65A can be used by any station set up for PSK31. It is now the standard accepted mode for EME operation on the 6m band worldwide, and the extra sensitivity provided by this special mode makes it possible for single yagi stations to complete moonbounce contacts on the 6m band. Even though the sunspot cycle has not provided very good ionospheric propagation, cndx are EXCELLENT for 6m EME because the geomagnetic field is usually very quiet - a few days each month are optimum for EME and can be predicted in advance because of the orbit.

JT65A is one of the weak signal modes included in the free WSJT package of programs available at:

http://www.physics.princeton.edu/pulsar/K1JT/wsjt.html

In addition, a setup checklist for new JT65 users is available on my web page:

http://www.bigskyspaces.com/w7gj/JT65.pdf

I have completed 6m EME contacts with 134 DXCC so far, and most of those contacts were with single yagi stations using JT65A mode while the moon was near their horizon. The secret to success (besides using JT65A mode) is for a single yagi station to KEEP THE ANTENNA AIMED ON THE HORIZON! This permits the yagi to generate extra GROUND GAIN that can make it perform like a 4 yagi station aimed up in the sky! Ground gain is best when the terrain in front of the antenna is free of "ground clutter" such as houses, rooftops, cars, valleys, etc....and the VERY BEST of course is when the antenna can look directly out over the ocean!

I have worked a handful of 100w stations during the optimum times of the month (the smallest had a 3 element yagi), but most of the stations I have contacted have had at least 500w and a well designed 6 or 7 element beam.

A very popular amplifier among DXpeditions has been the ACOM 1000 (HF + 6m kw amplifier): http://www.acom-bg.com/a1000.htm. M2 alsomakes a solid state kw amplifier, the 6M-1000, which is very small and only weighs 12 pounds! That is what I used on my recent 6m EME DXpeditions from 3D2LR, 5W0GJ, E6M and TX5K. I have also worked a number of stations using the Elecraft KPA500 HF+6m amplifier.

A very popular 6m antenna that has worked very well on 6m EME DXpeditions is the lightweight and very portable M2 6M7JHV: http://www.m2inc.com/products/6m/6m7jhv.html or the very portable and high gain M2 6M8GJ (when broken down, no pieces are more than 44" long, which allows transport in a bag meeting international airline requirements for checked baggage), which I used very successfully on all my 6m EME DXpeditions: http://www.bigskyspaces.com/w7gj/6M8GJMAN1.pdf The M2 6M5XHG also features the same portable construction as the larger 6M8GJ, but is only half as long when assembled:
http://www.m2inc.com/index.php?ax=amateur&pg=178

If you do not need such a portable antenna, these home made antennas using the YU7EF design have worked very well for 6m operators all over the world, and are easy to reproduce:

http://www.yu7ef.com/ef0607.htm
http://www.yu7ef.com/ef0608.htm

The YU7EF designs are especially nice if you are operating near salt water, because the elements are all one piece and insulated from the boom. I have contacted stations using them even when they only had 100w on 6m.

Please do not hesitate to contact me if you have any questions or I can provide any additional information. I look forward to hearing from you and hope to contact you soon off the moon! MNI TNX for your kind consideration!

DXCC NEWS (Deadline Reminder!). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder to all DXCC program participants that the deadline for the 2013 calendar year ends on Tuesday December 31, 2013. In order to appear in the Annual Listing, published in the electronic version of the DXCC Yearbook, you must have your submission postmarked no later than December 31, 2013. Since the DXCC workload usually peaks around this time each year I recommend that applicants not wait until the last minute to get their submissions in. Besides being the heavy period for DXCC, keep in mind that it is also around the holidays so the post office can contribute to any delays in getting mail to DXCC." For more and complete details, see the DXCC Blog at:

K9W WAKE ATOLL PRESS RELEASE #7 (Dated December 9th): "The Wake Atoll Commemorative Team wants to thank the DX community for the outstanding response to 'The Forgotten 98 Commemorative DXpedition'. Also, we need to express our gratitude to our hosts on Wake, the United States Air Force. Our DXpedition was warmly welcomed and their support was invaluable.

The final QSO percentage per continent are Asia 32.3%, Europe 26.9%, NA 35.3%, OC 3.1%, SA 1.8% and AF 0.6%. The Team is extremely pleased to have distributed the QSOs to much needed parts of the world, especially EU which has the most difficult path to Wake Island. There were 53,765 CW, 38700 SSB and 7562 Digital QSOs.

The Team has uploaded all 100,000 plus QSOs into ClubLog and the printed QSLs are in transit to the QSL Manager, Joe, AA4NN. Most, if not all, corrections have been made to the Clublog upload. Please use <info@...> for possible problems with the ClubLog upload.

As mentioned on our website, the use of OQRS is highly recommended. It is an efficient and faster method for returning your QSL.

<http://wake2013.org/pages/qsl.html>

Please support our Sponsors and the various worldwide DX Foundations and local clubs. Those contributions, as well as, your individual donations provided the necessary funding for this extremely expensive DXpedition. Without this unwavering assistance, Wake Island would still be high on the 'Most Wanted List'. All of us in the DX community owe them (and you) a hearty round of applause!
Happy Holidays to all! -- 73, Lou N2TU and the Wake 2013 Commemorative Team"

IRCS ABOUT TO EXPIRE (Reminder/ADVICE). Jess, KR4OJ, informs OPDX readers: "As most everyone knows, IRCs purchased after Jan 2009, are due to expire on Dec 31, 2013. I had several & went to my local post office to cash them in. Of course, they had no idea what an IRC was, and had never heard of them. After some phone calls, they finally acknowledged them, but DID NOT want to redeem them for full value. To save yourself some time & to get the full current value of your IRCs, in the USA, ($1.10) go to the following USPS bulletin, print and carry it with you. You can get $$$, however I just swapped mine for the new 'Universal' Forever Stamp."

ZS2DL QSL CHANGE. As of January 1, 2014, QSL Manager Buzz, NI5DX, will no longer be assisting ZS2DL as his manager. Donovan has decided that he will handle his own QSLing. Buzz will continue to answer any QSL requests for contacts prior to January 1, 2014, until March 1st. At that time, ALL requests for a ZS2DL card must go direct to ZS2DL. All Bureau cards must go to ZS2DL as NI5DX will no longer reply to Bureau cards after January 1st.

SOUTHEAST & ASIAN TOUR. Vincent, F4BKV, will be visiting some Southeast Asian countries until December 22nd. Activity will be very limited on this trip. His tentative scheduled is as follows:

December 14th - Singapore (AS-109); callsign probably 9V/F4BKV
December 17-18th - Brunei (OC-088); callsign probably V8/F4BKV
December 20-22nd - Labuan Island (OC-133), East Malaysia; callsign probably 9M6/F4BKV

QSL via his home callsign, direct or by the Bureau. He does have a log search and OQRS at: http://www.f4bkv.net/

SV/A, MT. ATHOS. "The Daily DX" is reporting that Monk Apollo, SV2ASP/A, the only active station from Mount Athos, has lost all of his antennas during a big wind storm last week. Apollo does not know when he will have the time to get something back up in the air. The SteppIR crashed into the garden. SV2ASP is currently in Corinth, Greece, for the olive harvest.

TM70, FRANCE (Special Event). Look for special event station TM70BBC to be active between June 3-13th. The special callsign is to commemorate the 70th anniversary of the landing of allies forces in Normandy. See QRZ.com for more details and QSL info. QSL Manager is F5UOW.

TO22, GUADELOUPE. Gildas, F6HMQ, will once again be active as TO22C from Guadeloupe between February 20th and March 6th. Activity will be on all bands, plus an entry in the ARRL International DX SSB Contest (March 1-2nd). QSL via F6HMQ.

XU, CAMBODIA. Pat, N2IEN, informs OPDX that he will be active as XU7AEV between now and December 21st. Activity will be holiday style and should be mostly CW on 40-10 meters. He is using an IC-7000 and a Buddipole in a vertical configuration. Pat mentioned on Friday that he tried calling CQ on 10.105 MHz, but the band seems completely dead. QSL via his home callsign; SASE preferred. He will also attempt to upload log to LoTW.

XU7, CAMBODIA. Alex, M6CFW, will once again be active as XU7AEU from Phnom Penh between January 9-14th. He states, "I'll be taking some antennas for different bands and will try for some phone contacts as well as my normal PSK working - sorry I still haven't learnt CW to a good enough standard. This time I'll be taking a Yaesu FT-897D with me as my trusty Icom probably won't survive another flight (thanks Emirates). I'll try to operate for several hours each evening (UTC+7), and maybe a few hours to suit North & South America." If like last time, Alex will post his log to eQSL immediately, Clublog at the end of the trip and LoTW. QSL cards are available direct via his home callsign of M6CFW in England, along with a self addressed envelope and 2 euro or 2 USDs or a valid IRC. If you are in the UK you can just send an SASE. CARDS WILL NOT BE SENT VIA THE BUREAU.

YJ, VANUATA. Operators Bill/N7OU and Rocky/NE7D will be active from Port Vila, Vanuatu, between February 11-25th (2014). Callsigns to be announced. Activity will be on 160-10 meters using CW. They will be using verticals on a north-facing shore and 500w amps. They will also be a Multi-Single entry in the ARRL International DX CW Contest (February 15-16th). QSL via their home callsigns. Logs will be uploaded to LoTW as soon as they return to the USA.

ZS9, SOUTH AFRICA (Special callsign to celebrate President Nelson Mandala's legacy). The SARL will be operating special event stations from around South Africa using the callsign ZS9MADIBA. Members of the SARL are invited

to apply for time slots to operate ZS9MIDIBA from their own shacks. QSLing is via the Bureau or by sending your QSL to: SARL, P.O. Box 1721, Strubens-vallei 1735, South Africa. You may also use Logbook of the World (LoTW). To receive the special QSL card by mail, include 1 USDs for postage.

ZS9MADIBA is the South African Radio League Special Event Station commemorating the life and recent passing of Nelson Rolihlahla Mandela, elder statesman and first democratically-elected President of the Republic of South Africa. Affectionately referred to as "Madiba", he became one of the most recognized leaders in the world and was instrumental in the peaceful transition of South Africa from minority rule to a constitutional democracy. South Africans join the people of the world in mourning his passing and celebrating his legacy. For more details and the operating schedule, visit: http://www.amateurradio.org.za/zs9madiba.htm

papers given between these TWO CTU events. Each CTU will have unique and updated presentations - so it is best to attend BOTH CTU's in 2014 so you do not miss anything!

The first USA CTU will be the Dayton Contest University on Thursday May 15, 2014 at the Crowne Plaza Hotel. This is the day before the Dayton Hamvention opens. There will be over 20 presentations (all new) by top contesters and station builders. With four classrooms running most of the jam packed day. CTU Dayton registration will open up soon (during the next two weeks). Space at CTU USA Dayton will be limited - and Crowne Plaza hotel rooms are already fully booked.

Check the official CTU website for registration and updated information:
http://contestuniversity.com/

Please take a look at the VIDEOS section for highlights from the USA CTU 2013 sessions.

The second USA CTU will be held at the historic 2014 ARRL National Centennial Convention in Hartford, CT on July 17, 2014.

The CTU Centennial will be an all day event with six CTU presentations in one class room. Again, the ARRL CTU will have six NEW presentations that are not the same as the CTU Dayton event.

You can learn more about the ARRL Centennial event here:
http://www.arrl.org/files/file/Centennial%202014/QST_Nov_Centennial_Ad.pdf

Registration for the ARRL Centennial CTU will be handled through the ARRL.

Please forward this CTU update email to your contest clubs.

DXCC NEWS ---> 9X0XA (Rwanda, 2013 operation), T6TM (Afghanistan, current operation) and VU7AG (Lakshadweep Islands, 20 November - 10 December 2013) have been approved for DXCC credit. [TNX NC1L]

INDEXA NEWS ---> "The officers of the International DX Association, INDEXA (www.indexa.org), have agreed to send an additional donation of 2,500 USD to the Amsterdam Island, FT5ZM, DXpedition team. INDEXA's financial support for this DXpedition has now grown to 10,000 USD. Our membership of worldwide DXers has been generous to us this year with donations. Thus,

INDEXA felt further support to the FT5ZM team was appropriate".

K9W ---> The K9W Wake Atoll Team thanks the DX community for the outstanding response to The Forgotten 98 Commemorative DXpedition. K9W made 53765 CW, 38700 SSB and 7562 digital QSOs. The final QSO percentages per continent are NA 35.3%, AS 32.3%, EU 26.9%, OC 3.1%, SA 1.8% and AF 0.6%. All of the QSOs have been uploaded to Club Log, and "most, if not all, corrections have been made". Please write to info[@]wake2013.org for possible problems with the ClubLog upload. The printed QSLs are in transit to the QSL manager (AA4NN). The use of OQRS for direct and bureau cards is highly recommended (see http://wake2013.org/pages/qsl.html). [TNX W8GEX]

QSL HP0INT ---> Vincent, F4BKV mailed about 50% of the direct cards for the Panama IOTA Tour on 12 December, the others will follow on the 23rd. Those letters will be sent from Hong Kong, he says; direct requests with French postage stamps on their SAEs will be processed in early January.

STORMY WEATHER: OH8X ---> Radio Arcala (OH8X) has lost its 100m (330 ft) tall tower that supported 160m and 80m Yagis. The structure weighed 40 tons (80,000 lbs) and did not survive recent storm Oskari's gusts of up to 68 knots. "The mammoth structure collapsed peacefully, not hitting any of the other six towers, not hurting people or damaging buildings", OH2BN reports. "It is suspected that automation designed to enable the array to find its most comfortable position in high winds somehow locked up and caused the structure to corkscrew and crumble down on its on base".

STORMY WEATHER: SV2ASP/A ---> The Daily DX reports that also Monk Apollo, the only active station from Mount Athos, has lost all of his antennas, which "fell down in the big wind storm last week". Apollo is currently "in Corinth, Greece for the olive harvest" and "does does not know when he will have the time to get something back up in the air".

Breaking News from the Land of Santa Claus
```

OF9X ☐ OLD FATHER 9 XMAS

Do you remember the Ho-Ho Santa Claus who penetrated the bands and talked
to children all over the world from Santa☐s homeland - Finnish Lapland?

If you don't ☐ just refresh your memory at QRZ.com (www.qrz.com/db/OF9X).
Santa's helpers are now whispering that the white-bearded Old Man will be
on the air this year again. The focus is on this coming weekend to remind
you of the fun period of Christmas and to create the right spirit for
families with children throughout the world. Just as last year, this will
happen on the radio waves and hopefully on a variety of bands. Not many
people knew then that Santa can even send Morse code!

Already tonight and over the next few days, Santa will appear around
14.235 kHz while loading up his sleigh for the weekend's world tour.
Just go for it and get involved ☐ let your children or grandchildren
feel the true coming of Christmas and the presence of Santa Claus.

```
The upcoming Friday announcement may again include Santa's personal
token to those who truly believe in Santa Claus.

Season's Greetings from the Land of Santa Claus!

CHRISTMAS GREETINGS FROM REPUBLIC OF KOSOVO

History was made on Saturday, 14 December 2013, when 52 young Kosovars
aged between 18-21 years were seated in the amphitheater of the Technical
University of Pristina to take the first ever amateur radio exam under
```

the new laws of the Republic of Kosovo.

To everyone's great delight, fifty (50) of them walked away as new amateur radio operators qualifying for a U.S. General level license. The administrators were not yet prepared to receive higher class exams as procedures are now in place only to take the equivalent of U.S. General or CEPT Novice exams. The procedural framework is set to follow the U.S. structure, and several ARRL manuals were given to the national association for Amateur Radio in Kosovo (SHRAK) as well as to the Telecom administrators - thanks to the ARRL for their kind support.

IARU Region 1 President Hans, PB2T, and Martti, OH2BH, of Project Goodwill Kosovo were working earlier on Saturday with the Exam Commission to help with adjustments made to new question pools. They also attended the opening ceremony and were present overseeing the actual exam. The administrators wished the students good luck and emphasized to the future hams their role as representatives of their newborn country.

It was an historical and emotional event in many ways, more than doubling the amateur radio population of the country. Another encouraging sign was that the young Kosovars were genuinely excited about this great passion, and many had already made numerous friends and QSOs using a virtual ham radio simulator -- www.hamsphere.com/ -- the potential of which should be fully explored as another tool providing fair start-up motivation.

Assessing the overall weekend, PB2T and OH2BH felt strongly that the whole amateur radio community ought to have the pleasure of welcoming these young people during this Christmas. As the exam/license cost is 50 EUR (70 USD) per person, a major expense for today's youth in Kosovo, radio amateurs worldwide are invited to help the new hams with this entry level cost, and in return obtain personal details and a picture of their "grandchild" in amateur radio.

PayPal is set up at www.qrz.com/db/Z60A for transfering potential funds. Fifteen (15) license donations are already pledged by organizations including Daily DX, Yasme Foundation, DX University, European DX Foundation, and ClubLog.

You have the option of giving a personal gift to catch the Christmas spirit and to become a godfather in Amateur Radio.

Please kindly inform Hans, PB2T at <president@...> or Martti, OH2BH at <oh2bh@...> of your desire to help.

Let your Happy Christmas be extended to these young Kosovars. Season's Greetings and Thank You!

SANTA RADIO OF9X AT CHRISTMAS 2013

Santa always appears on short notice every year, and so does OF9X from the Land of Santa Claus. There is one thing that we cannot skip and that is Christmas. It is because of all those wonderful children of the world who persuade us busy people to settle down and remember that Christmas is after all for children - for whose who truly believe. So, take a moment and join us - welcome your children or grandchildren on a trip to Christmas world with the dedication it deserves.

Last year Santa became a figure in Amateur Radio with thousands of followers, and more than 800 Santa Awards were issued throughout the world. Santa Radio (OF9X) established itself also through the pages of QST, DL-QTC and Japanese CQ Magazine. Santa is here to stay.

Starting yesterday, Santa has been loading up his sleigh and will soon begin his journey across the world. It all starts from Finnish Lapland and ends up on Christmas Day in the United States. The main activity will be over this coming weekend before Christmas and, as Santa is busy, his elves will be much of the time at the controls of Santa Radio, OF9X. Just stop by and say hello. Santa should be around 25KHz up the band edge (CW) and 14.225 KHz or thereabout.

But something new has happened since last year - Santa has become a pro on Morse code.

In addition to SSB QSOs from a year ago or this year, you should now contact Santa also on CW to qualify for the 2013 Santa Cold Winter (CW)

Award. You should track your two (2) QSOs on ClubLog at www.qrz.com/db/OF9X and send your request by email to of9x@.... One of the QSOs should be from this year - 2013.

If you don't manage to work Santa on CW or SSB, or you only make one QSO this winter? No problem - not everything is lost as you have the option of compensating for the missing QSO by solving the Christmas Puzzle. Just send the details of your one 2013 QSO together with the two mystery words from the Puzzle, and you will qualify.

In case you need any assistance in filling in the puzzle, you may ask Santa for help - talk to OF9X and just point out the question line number and Santa will whisper to you the needed word. But only two lines at the most. On CW please just send "QSC NR". (Q-Santa-Claus)

While Santa Cold Winter Awards will be sent free of charge by email to those eligible, many have requested the Santa Award by post. Such a feature (OQRS)is now introduced as part of the log checking procedure on the OF9X QRZ.com page.

Santa's elves this year include Olli, OH0XX, Ville, OH1JD, Jaska, OH1TX, Rami, OH2BCI, Pertti, OH2BEE, Martti, OH2BH, Kati, OH2FKX (YL), Mari, OH2FPK (YL), Pekka, OH2TA, Pertti, OH2PM, Olli, OH6CT, Veijo, OH6KN, Kim, OH6KZP - and even the busy old man Santa himself with all the gifts he's got, now CW included.

Tap the Video and Audio button on the OF9X page at www.qrz.com/db/OF9X and you can occasionally see Santa and hear how your own signal sounds in the Land of Christmas.

Merry Christmas to all Amateur Radio operators and their children and grandchildren the world over. Enjoy your Christmas and share the joy of being together. Always!

Santa Claus, OF9X

YASME PRESS RELEASE (Dated December 18th) [edited]. "YASME FOUNDATION EXCELLENCE AWARDS -- The Yasme Excellence Award is awarded to individuals who, through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe.
The Board of Directors of The Yasme Foundation is pleased to announce the award of the Yasme Excellence Awards for 2013 to the following individuals:
* Tom Roscoe, K8CX: Tom is recognized for his dedication to collecting and publishing current and historical photos and other documents on his Hamgallery Web site at <www.hamgallery.com>. Hamgallery is an

excellent amateur radio resource provided free of charge to the online community. Tom is also the manager of the W3 QSL Bureau, contributing many hours to ensuring cards are delivered properly and promptly.

* Lee Sawkins, VE7CC: Lee's software is widely used to manage and filter DX cluster spotting output. Without such filters, the output of the spotting network would be overwhelming and unusable. Lee's filtering software enables logging programs to integrate with the spotting network for contesting and general-purpose operation around the world. Lee supports the local DX and contesting community in British Columbia and will be representing Canada in WRTC 2014 as the Team Leader from the NA-12 region.

* John Devoldere, ON4UN: Along with building one of the premier amateur stations in the world, John's contributions to the DXing community have been extensive. Beginning with "80 Meter DXing," published in 1978, his book expanded to "Low-Band DXing," which in its fifth edition has become the most widely used handbook for operating and building antenna systems on the bands at 7 MHz and lower frequencies. The book contains important advances in HF amateur technology and encourages operation on these bands.

* Michael Carroll, N4MC; Eldon Lewis, K7LS; Dean Gibson, AE7Q; and Joseph Speroni, AH0A: These gentlemen have been instrumental in providing convenient access by amateurs to information maintained in FCC databases. In the case of N4MC, his Vanity HQ site became the single most popular resource for U.S. amateurs seeking to obtain a desired call sign, on-the-air identity being a fundamental element of amateur radio. He continues to maintain the National Silent Key Archive at <www.silentkeyhq.com>. K7LS and AE7Q have created similar online services that can be found at <www.radioqth.net> and <www.ae7q.com>. AH0A was a pioneer in accessing the FCC databases and providing useful summaries of licensing information. The services made freely available by these four individuals have greatly enriched and educated U.S. amateurs.

* Ken Claerbout, K4ZW: Ken is recognized for his work in support of the series of video seminars and lectures produced in association with the Potomac Valley Radio Club. Initially focused on contesting, the scope has broadened to include a variety of operating and technical topics. More importantly, the videos have encouraged others to publish similar "webinars" and archive them for viewing at any time.

* Ashraf Chaabane, 3V/KF5EYY: Ashraf has become an energetic representative on all fronts of amateur radio in Northern Africa and globally. He presents a positive role model for amateur radio across the entire Arab world with his enthusiasm and competitive spirit. His mission is to see the day when the administration in Tunisia issues him the first personal license in that country. Ashraf will also be representing Africa as the Team Leader for the African team in WRTC 2014.

The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. 9466. Who are your DX Heroes?

http://n6pse.wordpress.com/2013/12/28/who-are-your-dx-heroes/

Do you ever stop to think who are your DX Heroes?

You know, those guys that travel far and wide to organize or participate in DXpeditions to exotic places.

Some of these DX heroes are bold and daring. Some of them always put on a spectacular show with style and finesse.
Some of them are unsung and are often not recognized for their many contributions to our great hobby.

My DX Heroes are a diverse group. I greatly respect and admire my friends and Heroes Hrane Milosevic-YT1AD and David Collingham-K3LP.

These men are truly unsung DXpedition Heroes, they have organized or participated in many DXpeditions to truly rare places, Baker Island, Swains Island, Iraq, Rotuma, Conway Reef, Yemen to name a few. In addition to their activations, they also practice the concept of "Youth Development" by trying to stimulate local activity when they can. They also guide and mentor new DXpeditioners and help them be at their best. I have greatly benefited from David and Hrane's mentoring.

Also among the unsung DXpedition Heroes are my friends Antonio Gonzalez-EA5RM and Silvano Borsa-I2YSB. Tony has led his group known as the DX Friends or "Tifariti Gang" to such places as Western Sahara (twice) Rwanda, Palestine, San Marino, South Sudan, Andora, SMOM, Vatican City and most recently 5J0R.

Silvano has led the "Italian DXpedition Team" to successful DXpeditions as TU2T, 6O0CW, TT8TT, XT2TT, TO2TT, 5V7TT, 5U7B, J20MM, 9L1X, 9G5TT, 5M2TT and others. Silvano and Tony lead their groups with humility and within the finest examples of "Ham Spirit". Tony and his Team were very enjoyable partners in the activation of South Sudan in 2011 as a new country. Our DXpedition ST0R was a great success and I will always be very proud of that partnership. I was very proud to award Silvano with the first annual "Intrepid Spirit" award at the International DX Convention in 2012.

I have come to appreciate and respect the work of Bob Allphin-K4UEE and Ralph Fedor-K0IR. Bob and Ralph have organized and led some of the largest and most important DXpeditions in decades.

They always put on a fantastic show with great style and finesse. Bob and Ralph's current project is FT5ZM Amsterdam Island which gets underway in just a few weeks. They have also collaborated on HK0NA, VP8ORK, Peter Island, South Georgia and South Sandwich and other important activations. On top of that, both of them are good men who are approachable and willing to share tips, ideas and suggestions. I greatly admire what they have done and how they do it!

Another class of DXpedition organizer are those that I consider bold and daring. My friend Dima-RA9USU and Vlad-UA4WHX are certainly bold and daring. Dima brought his life savings to Yemen and was able to make significant contacts and to ultimately pull off a very successful DXpedition to a very rare country. Dima has become a good friend having also joined my ST0R team in South Sudan.

Vlad-UA4WHX has activated many exotic entities in his travels. He is a top notch operator and a very fine QSLer. I enjoy watching where Vlad goes and working him.

I recently got to meet and operate with Franz Langer-DJ9ZB and Zorro Miyazawa-JH1AJT. Franz has travelled the world and has participated in numerous important DXpeditions. He is a very fine Operator and his work ethic is amazing. I am very glad to know Franz and to now be able to call him my friend. I can say the same about Zorro-JH1AJT. He recently invited me to join his XZ1J Team which enabled me to get to know Zorro. He has also led or has been part of DXpedition groups to such rare countries as Bangladesh, Yemen, Eritrea, Ethiopia, Kenya, Laos, Bhutan and others. Zorro is a very humble business leader and humanitarian. He has done more for the world than anyone will ever know.

I’m sure there are other DXpedition Heroes out there, others come to mind but for personal reasons these men are my true DX Heroes.

What do you think?

5C, MOROCCO. Ruggero, IK2PZC, will once again be active as 5C2P between February 6-9th. Activity will will be on HF bands using SSB and RTTY. He will also be in the CQ WPX RTTY Contest (February 8-9th). QSL via IK2PZC.

QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org

7Q, MALAWI. Ken, LA7GIA, is expected to be active as 7Q7GIA for one week in May/June of 2014. QSL via his home callsign.

8Q, MALDIVES. By the time you read this, Mike, OE1SSS, will be in the Maldives and plans to be active as 8Q7SM. On his QRZ.com page, Mike states from December 28th to January 4th, he and his XYL will stay on the boat "SCUBASPA" for diving. After this trip, they will go to the Kandooma Resort and stay on the island until January 11th. Activity will be on 40/30/20/10 meters (depending on the conditions and his XYL). QSL via his home callsign.

C5, THE GAMBIA. Pedro, ON7WP/C5WP, announced on QRZ.com that he and Andre, ON7YK/C5YK, are or will be the only two permanent licensed hams in The Gambia for 2014 (as of now). Pedro will be active between January 11-15th, from the village Buntu (where he does charity care), and has set up his permanent base station (Kenwood TRC-80 Bush Radio and a brand new 5 band Spiderbeam). He also states [edited], "Additionally, I will

put up some traveling wave V-beam antennas to USA and EU. We will also try some low band activity, but due to poor soil conductivity I expect not too much apart from extremely low noise levels (closest electricity wall outlet is 80 km away). Between January 16-22nd, we will move to the Kololi area where we will try some serious Low Band stuff based on a sea mounted vertical, together with dipoles and the V-beam for the high bands." See QRZ.com for QSL info.

C6, BAHAMAS. John, 9H5G, will once again be active as 9H5G/C6A from Stocking Island, Great Bahama Bank (NA-001), between January 1-31st, 2014. Some of these are rarer than others, but since I will be traveling by boat, I am required to validate NA-054 and NA-048 through the IOTA Committee. I also hope to activate some islands that are not on the list, even although they seem to qualify (Hogsty Reef, Melita Cay). I hope to have more information on this soon." Watch QRZ.com for updates. QSL via LoTW, eQSL or direct to Buzz, NI5DX.

C9, MOZAMBIQUE (Update). Karel, ZS6ALB, informs OPDX that he is now permanently based in Mozambique and is active as C91KHN (C91C during contest) from Matola, Mozambiue (Grid locater KG64fa). Band Operations: 6m - 5 element Yagi

John informs OPDX that their "ten day C91J and C91B DXpedition (earlier this month) was such a success (and really enjoyable) that we have negotiated with the owner of the sea-view cabin we stayed in, to go back for another ten days. We will be in Mozambique tomorrow 28th December through 6th January. We will be taking more antennas this time, specifically...resonant antennas on 40/17/12, so we will be able to use the amplifier on these bands, which we were not able to do on our last trip. So, 40 - 6 meters, SSB, CW and we will attempt the digital modes and RTTY also." Remember, you can see pictures from Beth on QRZ.com under C91B. QSL only direct to PO Box 102303, Meerensee, 3901 SOUTH AFRICA (with 3 USDs and your QSL card, and you willvget a QSL card back direct via air mail).

FR/T, TROMELIN (Press Release)[edited]: "Hi friends -- Most of the DXers consider entities as check boxes to tick once the country is worked and confirmed. That's the game! However, we hope to bring you a lot more than just a simple check mark as you discover our next destination... Let's talk about the 9th most wanted DXCC entity according to the Clublog statistics, an empty box for 75% of the amateur radio community.
Tromelin, as well as Glorioso, Juan de Nova, Europa, belongs to the □Eparses□, a French word to name these small islands scattered around Madagascar. These French territories are administered by the TAAF (Terres Australes et Antarctiques Françaises). Their access is strictly controlled and regulated in particular for ecological reasons. Tromelin is the smallest one (1 square km) and the human impact is all the more sensitive. That's the only island where there are no French military troops and only 2 agents of the TAAF are posted there continuously.
The last operation took place in 2000. A 4 men team made 50,000 contacts with the callsign FR/F6KDF/T. No authorization has been given ever since. 2014 will be the 60th anniversary of the 1st hamradio activity from Tromelin. The operator was Marc, FB8BK/T.
Today, after some successful collaborative work with the TAAF authorities, we are proud to announce that we received our landing permission and got the green light to conduct an amateur radio operation on this remote island. We'll be active on Tromelin from October 30th to November 10th, 2014.
6 operators have been allowed to stay of the island. They have been selected for their experience and all six are ready to face the challenge. The team is made up of Seb/F5UFX, Michel/FM5CD, Flo/F5CWU, Eric/F5SIH, Franck/F4AJQ, and Fred/F5ROP.
The request is huge and we are conscious of this. For this reason, we are working hard in order to prepare our operation in depth. Some places in the world will have short openings and we□ll do our best to exploit these short moments with proper planning adjusted with the help of pilots.
The coming months will be devoted to the search of sponsors. We already have part of the equipment but partnership with equipment suppliers will be essential. On the other hand, we will contact foundations, clubs, organizations to request assistance to help us balance our budget, estimated at 90,000 USDs, most of which is devoted to logistic costs.
Our website is online. All details regarding the progress, plans of the DXpedition and sponsorship opportunities will be accessible through

dedicated pages.... http://www.tromelin2014.com
We will regularly keep updating you until our departure.

Team Tromelin 2014

OF9, FINLAND (SANTA QRT). From the Offices of Santa Claus, Lapland, Finland -- OF9X SANTA WENT QRT WEDNESDAY, DEC.25 AT 07 UTC -- This year, Santa Claus of Amateur Radio fame was somewhat different than in the past. A total of fifteen (15) radio operating elves and their support personnel brought Santa and Christmas cheer to ham families in a very special way, with several added elements to highlight the Festive Season. Not only were some 21.000 QSOs uploaded to ClubLog but associated with these QSOs were many interesting occasions when Santa was in personal contact with children all across the world. Those are moments to be treasured!
Of those 21.000 QSOs, a sizable proportion were made on CW as well as on low bands, utilizing state-of-the-art remote technology of Radio Arcala, OH8X. Moreover, extensive special hardware elsewhere was employed to add to highly dedicated operators in the Far North. Everyone was determined to push their personal Christmas envelope to its limit.
Santa would like to summarize your eligibility for the Santa Claus (CW) Award which you can order by E-mail at <of9x@...>. You can check your QSOs at <http://qrz.com/db/OF9X>.
1: You have a QSO with OF9X on SSB & CW - also 2012 Santa QSOs count.
2: You have only one 2013 QSO with OF9X - here correct passwords from the Christmas Puzzle at qrz.com would compensate.

Additionally, you can A:) order a Bureau card, B:) direct airmail QSL cards, and C:) a direct Award and QSL cards through ClubLog's OQRS facility.
See again the QRZ.com re: OF9X....
Thank you for contacting Santa on many modes and bands during Christmas 2013. Hopefully we will meet again next year.

IRC REDEMPTION ETC... QSL Manager Phil, G3SWH, reports: "Hi gang -- Just a cautionary note for those of you who still use IRCs. With effect from 1st January 2014 and in common with most other UK based QSL managers, I will *NOT* be accepting IRCs for payment for return postage. They are just too much hassle. OQRS and US dollars are much preferred and easier to handle. Please take a look at <http://www.g3swh.org.uk/postage.html> which has been in place for about six months. In that time, I have received probably less than 10 of the new, 2017 expiry IRCs.....
73 and Happy New Year to you all"

SOUTHEAST ASIAN TOUR. Toshi, JA8BMK, will activate two DXCC entities during the first two months of the new year. Activity will be holiday style using a HEX beam/wire antennas/Inv.Vee. Operations will be on 160-10 meters. Toshi informs OPDX that the modes will be CW and SSB, not sure about the Digital (says may be not). He will use a K2 with a 500w amp. QSL via JA8BMK, by the Bureau or direct (see QRZ.com). His tentative schedule (Starting/Ending dates are flexible) and callsigns are as follows:
January 15-30th - Callsign is XW8BM; from Vientiane, Laos.
February 15th-March 2nd (possibly 25th) - Callsign is XV2BM; from Nha Trang (eastcost of South China Sea), Vietnam.

MORE INFO FROM JA8BMK (Just before going to print!)[edited]: "I will leave Japan for Vientiane via China on Jan. 11, 2014, and I am scheduled to receive the license at PTT office. The thing is the location to operate. Vientiane is not a exceptional, noisy city and it seems very difficult to put up a vertical antennas for low bands. I will spend a few days to find a good location for antenna installation. Also, I must explain to the hotel people about what amateur radio is. Sometime, they do not give the permission to visitors as they have no knowledge on amateur radio. However, I succeeded in 3D (Fiji) land by explaining about BBC which I like to listen to.
Regarding my antennas, I left them in Nepal. They are KIO Hex beam and wire/vertical and coax cable for the next operation. This time I bought another Hex beam from DX Engineering. This is a very good antenna and seems strong. But the problem is that it takes a long time and I modified it so that Airline company (China Eastern) will accept the size which is only 158cm total dimension X+Y+Z as maximum. They will accept two of 23kg per person, I got 92kg for the luggage with two persons, my wife and I. The 158cm as a total dimension is now popular. The longest length is 96cm after modifying and I made a wooden box for them(28x30x100cm O.D.). KIO Hex beam seems cheaper and lighter, and simpler to assemble compared with DX Eng. Hex beam. For DXpedition, I like to recommend KIO.
The license fee is not cheap in XW (may be, in XV, too) as well as 9N. The fee should be calculated according to how many bands, how much power, what frequency, what mode and how many days. These factors can be multiplied. I heard in XW PTT office that one Russian guy payed over 2,500 US dollar before!
My schedule is not sure after XW operation. But I will be in Indo-China until Mar. 28th, 2014, and will try to visit some other entity if I have time. Anyway, I am traveling with my wife, I will not be so free as I must take care of her."

T6, AFGHANISTAN. T6EUPOL is the official ham radio station of the "European Union Police" (EUPOL) Mission in Afghanistan. The station is operated by Janusz, home callsign: AK4JK (aka T6/ZS5ADU). No QSNs have been listed yet on the DXCluster networks. QSL only direct to the AK4JK postal address together with the SAE plus 2 USDs for postage.

T8, PALAU. Masa, JN3MXT, will be active as T88MX from "VIP Guest Hotel" (Free Radio Room) on Koro Island (OC-009) between January 25-30th. Activity will be on the HF bands using mainly SSB and RTTY. QSL via his home callsign.

TM11, FRANCE (Special Event). Look for special event station TM11AAW to be on air February 1-2nd, 7-10th and 14-23rd. Activity is to celebrate the 11th Antarctic Activity Week. Operation will be made by François, F8DVD, from his QTH of Mâcon in the east part of France, 60 km, North of Lyon. The new reference for WAP program is 245. Activity will be on 40-10 meters, mostly SSB. QSL via F8DVD, by the Bureau or direct (SAE + 1 new IRC or 2 USDs) to: François Bergez 6, rue de la Liberté F- 71000 MACON FRANCE. TY, BENIN (Update). Wim, ON6DX (ex-ON4CIT), who was active as 5V7TH recently from Togo, announced this past week he finally received his Benin callsign TY1TT from the telecom authorities. He states, "Was not easy, took me the longest time and most expensive ever to get a callsign. Now I can plan flights and lodging beginning 2014 in Benin." No specific dates were mentioned yet. Activity will be from Grand PoPo and operations will be on 20/17/15/12/10/6 meters using CW, SSB and RTTY. Wim did mention, "Clublog is a fine tool, but this year: OQRS QSL: Yes, but... But no more clublog leaderboards." Read his reason and look for updates at: http://www.dxpedition.be/Benin.html

VQ9, CHAGOS (Update). Last week we reported that Jim, ND9M, is once again active as VQ9JC from Diego Garcia. Jim informed OPDX that he arrived on the island a month ago, but he had to get his license renewed; it expired a couple days before he landed. Jim states, "Normally, I get it renewed within one business day, but this time there was an administrative hiccup that led to a month-long delay. The British military officer in charge of the island ☐ called the 'Brit Rep' ☐ was new to his post here. He read all the can's and cannot's of the job, and the legal info about issuing ham licenses says that tickets are signed by the Territorial Commissioner who's back in the U.K. The Brit Rep finally got the official word last week that issuing authority was delegated to the local office, and my license was signed the next day. This was the first time in the 15 years I've been coming here that anything like that had happened. In fact, licensing had been so smooth here that in 2008, I walked in to the Brit Rep's office without an appointment and left 45 minutes later with not only a signed renewal for my regular VQ9JC license but also a special temporary license for my VQ98JC operation. I wonder if anyone else can claim receiving two licenses fully authorized without previous notice that fast! Anyway, I'm still operating Field Day style from the covered picnic table at the park which has AC power and dozens of gecko lizards chasing the bugs. The table is about 30 feet from the wall of the jungle, and this weekend I'll try to thread a 135-foot OCF dipole through all the trees in the jungle so that I can not only leave the antenna up but also have multi-band capability. If I hoist the antenna where it can be seen, I would stand a very good chance of it being quickly removed as the 150 pound fishing line that I use to secure the antenna and the copper wire are both precious commodities here. The OCF dipole doesn't work on 15m, 30m, or 60m, even with a matchbox, so I'll put up separate dipoles for

15 and 30 and feed those two and the OCF to a switch. I don't know yet if I'll put up a 60m dipole. The 80m OCF is going to be a big enough project just to get it hoisted to only 25 feet; the jungle's pretty thick! I'll also be putting up a 20m dipole and maybe a 30m dipole as well on the ship. Obviously, I sign /MM during any contacts made from the ship as I did earlier this year. Contacts with me as /MM aren't valid for DXCC of course, but SKCC ops can count them if my ship's QTH is near the island. The rig is an FT-857D. I'll be running 100 watts most of the time, but I'm expecting to do some QRP work from here too. Most of my operating will be CW as usual (with a cootie most times), but I'll be on SSB occasionally. Also, I'm a rookie when it comes to digital comms, but I'm hoping to get my Rigblaster and FLDigi software configured to do some PSK and RTTY work. While on board the ship, I use an Icom IC-760 that I have set up in my service shop. I feed the coax through a helicopter control center that's directly above my shop. My shipboard antennas are about 115 feet above the water line. I don't have internet connectivity when I'm at my operating QTH on the island, so I obviously can't help with real-time QSY requests or the ever present 'EU PSE' when I'm calling for NA & SA stations." OPDX asked Jim about the status of the club station, possibly using a special VQ prefix for 2014, activity on the satellites and if he would attend the 2014 Dayton HamVention, and he replied, "Yeah, the ham club station is gone forever unfortunately. The log periodic has been grounded and dismantled, and everything in the shack has been turned back over to the Navy. I'm here six months out of the year of course, but once Larry, VQ9LA left three years ago, there was no one reliably present during my off times. When the Navy's MWR office personnel made a routine visit, they found nobody there since I was Stateside, so they decided that the club was no longer in use and took what they thought were appropriate steps. By the time I got back to the island and worked my way up the chain of command, the deal had been sealed. And yes, I'm working the satellites out here although there aren't many ops to work. I'll be on the birds when I get home again next year. I don't know yet if my XYL Cori (KK4CGA) and I will be at Dayton this coming May or not. We're hoping to go to New England for the ARRL Centennial in July, and we'll likely do only one trip. My assignment schedule has me returning to the ship a few days days before the national convention, and I'm trying to work things out with the guy that's here when I'm off ship for him to stay a little longer so that I can attend. He hasn't given me a firm answer yet though..... My plan for 2014 is to get VQ94JC issued for sometime during the second half of the year. The local licensing office has no requirements toward my getting a ticket other than having one already issued by the FCC. My US license expires in April, and the FCC won't enable the renewing process until 90 days before the expiration date, so I have to wait until early January to do that. If I can get the renewed license here - actually just a scanned copy will do and my XYL will send that - I can turn that over to the local office, and they should issue me the short-term ticket. Emphasis on special. It's all legal of course, but the folks in that office are all British military who typically do one-year tours here before being

re-assigned, so I can never assume that the next person will cooperate. I'm optimistic though as I've already had 7 VQ9xJC licenses plus the VQ975FOC ticket earlier this year, so the precedent's pretty well established. When I started doing the VQ9xJC bit in 2007, I did it just for fun and I thought the WPX chasers would like it. I really didn't expect to still be doing it after so many years. Now I'm looking ahead at rounding out the decade of annual special callsigns and thinking about what special prefix variation to initiate after the 10th one!" QSL via ND9M.

CQ to Realign Publications, Launch New CQ Plus Digital Supplement
Hicksville, NY (December 23, 2013) -- CQ Communications, Inc. today announced plans to realign its roster of publications and to launch an exciting new online supplement to its flagship magazine, CQ Amateur Radio.

"The hobby radio market is changing," said CQ Communications President and Publisher Dick Ross, K2MGA, "and we are changing what we do and how we do it in order to continue providing leadership to all segments of the radio hobby." CQ Communications is currently the only publisher in the United States serving the broad radio hobby, from broadcast band DXing to amateur radio moonbounce and satellite communications. CQ itself has been amateur radio's leading independent voice for seven decades.

Effective with the February 2014 issue of CQ, said Ross, content from the magazine's three sister publications, Popular Communications, CQ VHF and WorldRadio Online, will be incorporated into CQ's digital edition as a supplement to be called "CQ Plus." With this change, hobby radio enthusiasts of all types will be able to go to a single source - CQ - for articles on the broader aspects of hobby radio, from shortwave listening and scanner monitoring to personal two-way services and Internet radio, as well as amateur radio. Richard Fisher, KI6SN, currently Editor of both Popular Communications and WorldRadio Online, will be Editor of CQ Plus.

"Our primary audience is ham radio operators," explained Ross, "but very few hams began their radio involvement as amateurs. Most of us started out as shortwave listeners, broadcast band DXers, CBers or scanning enthusiasts. Many continue to be involved in many different aspects of the radio hobby in addition to amateur radio."

"By consolidating four specialized publications into one," Ross continued, "we will be better able to keep these multidimensional readers informed on all aspects of the radio hobby while simultaneously exposing those who are not hams to all the excitement and opportunities that amateur radio has to offer. We see this as a win-win for all of our readers and our advertisers, who will now be able to reach a wider and more diverse audience."

The expanded material will be an integral part of the digital edition of CQ, and will be included as part of a standard digital subscription. Each month's digital edition will simply continue beyond where the print edition ends, offering supplemental material on all aspects of hobby radio communication and will include selected columns carried over from the other magazines. The added digital content will make full use of the multimedia opportunities presented by digital publications.

Current subscriptions to Popular Communications, CQ VHF and WorldRadio Online will be converted to CQ subscriptions - and receive CQ Plus at no additional charge! Details will be posted on each magazine website.

There's no need to wait to see the great variety of articles that will be featured each month in the new CQ and CQ Plus. A preview of the February issue's Table of Contents is available right now on the CQ website at <http://bit.ly/19mzbOK>.

This Marathon was run at the same time as the IOTA Chasers Marathon. The following are the entry arrangements: Submit your application to iota.activator@... in the form of a listing, indicating which category it is for: (i) individual operator, or (ii) multi-operator/club. For the 'individual operator' category, you need to include: name of the operator, callsign(s), name of island(s), IOTA reference group(s), exact date and time of the first and last QSO made, and total number of QSOs. In case of multiple activations of the same island/IOTA, provide information on exact times for start and end of each operation, as well as associated number of QSOs. For the 'multi-operator/club' category, include the same information as for an 'individual operator' plus the names and callsigns of operators, and the number of QSOs and length of stay each made on the island. Applications need to be submitted by 28 February at the latest.

The 2012/2013 IOTA Marathon finishes at 2359 UTC on 31 December 2013. We hope that everyone had a great time. IOTA Management has appointed Cezar, VE3LYC to chair the Marathon Referee Board. He is joined by Dan, W4DKS, and Bob, K3EST as Board Members. We are finalising the website over which electronic logs for the Chasers Marathon should be submitted - details will be announced shortly. In the meantime entrants may wish to prepare as follows: the log should contain only contacts with IOTA stations. Each QSO must include a full IOTA reference number, such as EU-005 or NA-001. It is recommended that logs be uploaded in ADIF (.adi) format, similar to that requested by ClubLog. However, a log prepared as an Excel spreadsheet will be accepted. Paper logs will not be processed. Any questions should be sent to iota.chaser@.... Cezar will monitor regularly the email addresses mentioned in this and the following News item.

Dear Budi

Many thanks for the validation material including the pictures from Kisar Island. I understand now that you started your operation on Saturday 21 December.

Everything is OK and we can confirm the issue of OC-272 to IOTA’s Barat Daya Islands group on the basis of the operation by you, YF1AR/8 and Imam, YB4IR/8. Congratulations on making 4460 QSOs between you – that is a big score. I am sure that the IOTA Community wish to join me in thanking you for this very successful operation.

Personally, I was delighted to make contact with you both.

Best regards for 2014

Roger

The first day of a DXpedition can be challenging for the DX'ers, the DXpedition's pilots, and the DXpedition operators. DX'ers are understandably anxious, thinking: 'Will I be able to work this DXpedition? I think 12 meters should be open, why aren't they operating there? I can hear them, but they're working JA's – why not me? The pile up is huge, I don't think I'll ever get through.'

Pilots in North America, Europe, Oceania, and Asia see their inboxes fill with emails expressing concern. They struggle to answer the many emails and may be saying, "Why did I volunteer for this?"

The DXpeditioners are still struggling to get everything running smoothly and they are typically dead tired. Unknowns invariably demand change and attention. They may have to QRT unexpectedly to re-route a power cable, install some ferrite cores, repair a shelter, or see where the smell of smoke is coming from.

In a day or so things settle down. DX'ers have learned the rhythm and pattern of the DXpedition and increased their confidence level. The DXpedition team has tamed their RF, gotten their generators humming, obtained some rest, and has sync'd their rhythm with that of the pile-up. The pilots breathe a sigh of relief and it's time to ask, "Whats the best way of working this DXpedition?"

I suggest you begin by going to our website and clicking on The DXpedition tab and then the Propagation tab. You will be taken to Create DX Prediction FT5ZM. Fill in you call sign, grid square, and select an antenna configuration that most nearly matches yours. Click on Save and in a few seconds a graph will appear showing predicted band openings to your area along with expected signal levels. You now know the bands and times when you are most likely to be able to work FT5ZM.

The Amsterdam Island team will use a more detailed propagation map enabling us to see these openings in greater detail. It will be especially useful to us for seeing openings to areas that occur "underneath" other openings. For example, if you are a U.S. station in the zero call area, your 1600 UTC opening on 17 meters will be "underneath" a European opening occurring at the same time.

After you're in the right place at the right time, following the DX Code of Conduct (there is a link to it on our home page) will give you the best chance of working FT5ZM.

Here are some things to keep in mind:

1. We will make every effort to be on as many open bands as we can, but at times we may have more openings than we can cover with our manpower and eight stations, especially when trying to operate on more than one mode per band.
2. As part of our permit, and to be appreciative guests, we will be assisting with some of the daily chores and duties at the Amsterdam base. We will be part of the base community. At this time we do not know the times and durations of those work details, other than that they will not be overly demanding.
3. Our two operating sites are over a mile apart. Night time walks between the two sites are prohibited. We may not be able to make this walk without a companion during the day.
4. Routine DXpedition chores will need to be done, including generator refueling, antenna maintenance, shelter cleaning, meal preparation, moving supplies, and attending to the unexpected.

Any of the above may interrupt our operating. Sometimes these issues may only allow us to be on a band for a few hours, even when it is open. But we feel dealing with the interruptions as necessary and operating on a band, even if it is only for a short time, is far better than not operating on that band at all. We hope you agree.
Our pilots are there to help you and help us. We will be in regular communication with them. They welcome your constructive comments and observations, but may not be able to respond to all the emails they receive. They WILL NOThave log and QSO information.
Please DO NOT contact them about busted calls or ‘not in log’ issues.
We are extremely grateful for the interest and support shown to us by the amateur radio community. Now it’s time for us to do the best we possibly can for you.
73 and we will see you from Amsterdam Island.
